- Minimum entry requirements for studies as legislated by the government do not guarantee a student admission to any programme or field of study.
- Also note, meeting the Faculty's minimum requirements for a particular programme does not necessarily guarantee admission to that programme (or a specific campus) as specific selection criteria may be applied.
- There could be changes in the site/s of offering of programmes (meaning that programmes could be moved to an alternative campus).
- Preliminary admission is based on the results obtained in the final Grade 11 examination. Final admission is based on the final Grade 12 results.
- Applicants must meet the criteria set by other faculties with regard to their chosen academic subjects. All additional criteria for specific learning area specializations, and/or subject methodologies have to be met as well.
- Applicants may also be expected to write an admission/placement test for all qualifications.
- The University of Johannesburg and its faculties have the right to change the requirements of a specific field of study. A restricted number of students are accepted in certain fields of study. In addition to the general minimum admission requirements, programme-specific entry requirements may apply.
