

Tubingen – South Africa Programme (08 to 30 January 2018)

My trip to Germany was amazing. It opened my eyes to everything that's out in the world. We had multiple different lectures while there and my favourite was Media and Literature.

As I studied Journalism and am still studying French literature I thoroughly enjoyed the seminars on these topics. The lecturers were very nice and informative and I enjoyed learning about German media and how it differs to South African media.

It was very interesting to learn about German literature and finding out that poets I love were German and I never knew.

We also went on excursions, we went to Daimler – where they make and produce Mercedes Benz cars. It was amazing to see how they put the car together from start to finish. After that we went to the Mercedes Benz museum.

The host family I stayed with, were extremely friendly and I felt right at home. I still have contact with my host Mom.

In hind side, I loved all of the seminars and excursions and the entire program and the German experience.

The scenery and buildings were breathtakingly beautiful.

I am very thankful for this opportunity and will remember this forever.

Ms Carla Westraad, BA Journalism, UJ
