STUDYING ONLINE

- Online studies give students the opportunity to plan study time around the rest of their day, instead of the other way around.
- Pay only for the modules you register for.
- Apply, register and complete all assessments online.
- This programme is offered fully online and no contact sessions would be required.

ONLINE ADMISSION REQUIREMENTS

- Grade 12 Certificate with diploma endorsement/university exemption.
- A good working knowledge of English, as the learning material will be available in English only.
- Relevant documentation for application: Matric certificate with diploma endorsement, ID/Passport.
- You must be computer literate as the programme will be presented online. The following is recommended:
 - A computer (desktop or laptop)
 - Reliable broadband Internet access
 - A PDF viewer (e.g. Adobe Acrobat)
 - Microsoft Word and Excel
 - A web browser (latest version), e.g. Chrome/Firefox/Internet Explorer

CONVENIENCE

IMPORTANT: This programme is offered fully online and no contact sessions would be required.

COMPREHENSIVENESS

The online Diploma in Logistics Management will prepare you for an exciting career in Logistics. Improve your prospects of career advancement by using this programme as a foundation for further studies in this fast growing field.

This qualification exits on NQF level 6 and comprises a full range of modules covering all the major functional areas of a logistics company. This is a three-year qualification.

JOB OPPORTUNITIES

This qualification provides you with the opportunity to improve your career advancement prospects in the logistics industry.

ASSESSMENTS

- Regular Knowledge Checks will guide you through the learning material.
- Every Learning Unit ends with a graded Self-Assessment Test which will indicate your progress.
- The Final Assessment will take place online during the last week of each study block.
- You will have two Final Assessment attempts.
- A pass mark of 50% is required for each module.
- If you fail your first attempt at the Final Assessment you will be given an additional opportunity to successfully complete the final assessment. The students need to understand that they will only get a second opportunity if they fail the first attempt.
- You must pass the Final Assessment in order to pass the module.
- You must pass all modules to obtain the online Diploma in Logistics Management.

CURRICULUM

- This prospectus gives a brief summary of the 18 modules offered.
- All learning material will be supplied online.
- It is expected that you buy the two prescribed textbooks.
- The Logistics Audit Report is a compulsory module in the third year.
- You must choose three of the four remaining modules offered in the third year.

DURATION

3 years minimum

FINANCE

Refer to the finance leaflet for more information regarding the fees, payment options, payment methods, etc.

Do take note that this online programme is not funded by NSFAS.

GENERAL INFORMATION

- 50% is the pass mark for the summative assessment for each module.
- All modules must be passed to be awarded the diploma.
- No credits for the full time or CEP Diploma in Logistics Management qualification can be transferred to this qualification.
- No credit for the Online Diploma in Logistics Management qualification can be transferred to the full time or CEP Diploma in Logistics Management qualification.
- The Diploma in Logistics Management (NQF Level 6) qualification will be awarded after successful completion of all prescribed modules.

PROGRESSION

FOR THE FIRST YEAR

Refer to the annual calendar on www.uj.ac.za/diplomaonline.

- The year consists of four block periods.
- You can only register for one or two modules at the beginning of the registration period in the first year.
- Thereafter pay for the next two modules and then add the modules.
- Should you fail, you can repeat the modules in the following year.

FOR THE SECOND YEAR

- The year consists of four block periods.
- You register for two modules at the beginning of the registration period, thereafter you pay and add one module for the next three block periods.
- Should you fail, you can repeat the module in the following year.

FOR THE THIRD YEAR

- The year consists of four block periods.
- You register for the year module: LOGISTICS AUDIT REPORT.
- You pay and add the three other modules out of a choice of four.
- You will have one block period free for the module you did not select.

FIRST YEAR

DCOMCE1: **BASIC END-USER COMPUTING FOR LOGISTICIANS**

The purpose of this module is to create competence in basic operating skills that are required to use any modern computer and specifically the operating system (OS) called Microsoft Windows. Some tools in the Microsoft Office suite will also be taught. This module will equip students with basic skills that open the door to advanced learning in computers.

DMATCE1: **BASIC MATHEMATICS AND QUANTITATIVE TECHNIQUES FOR LOGISTICIANS**

The purpose of this module is to introduce students to basic statistical methods, quantitative techniques, percentages and measurements. Students will be able to apply these concepts to demand forecasting and solve logistical and storage problems.

DILOCE1: **INTRODUCTION TO LOGISTICS MANAGEMENT**

This module introduces the student to fundamental logistics concepts and focusses on the important role of logistics in management decision making.

DBUSCE1: **INTRODUCTION TO BUSINESS MANAGEMENT**

This module provides a basic introduction to the functioning of the business enterprise and the role and importance of management.

Students are exposed to the managerial tasks of logistics managers and various methods of planning and controlling logistics performance.

DTPTCE1: INTRODUCTION TO TRANSPORTATION AND WAREHOUSING

The purpose of this module is to create competence in the transportation system related to operational structure, services and cost characteristics of the various modes of transport, focusing on the goods carried in the transport system and various freight service providers. The module also focusses on the role of packaging and containerisation, warehouse equipment and warehouse location in facilitating the efficiency of the supply chain.

DGOVCE1: OVERVIEW AND OBJECTIVES OF THE GOVERNMENT AND MUNICIPAL LOGISTICS SYSTEMS

The purpose of this module is to introduce students to the basic structure of the supply chain management process in government and its strategic planning and budgeting processes within supply chain management principles. This will enable students to interpret the legal environment within which the supply chain must be managed and addresses the procurement regime of government as well as the preferred procurement methodologies.

DPERCE1: BASIC PRINCIPLES OF LOGISTICS PERFORMANCE MEASURES

The purpose of this module is to equip students with vocational and industry-specific intellectual competencies, knowledge and practical skills in performance measures to enable the student to make decisions in the context of a logistics and supply chain organisation.

DORDCE1: PROCUREMENT AND ORDER PROCESSING SYSTEMS

The purpose of this module is to provide the student with knowledge and skills of the activities associated with buying, purchasing and the developments in a company and the understanding and competencies in applying specific purchasing management practices in the supply chain industry. This module will also provide students with skills and competencies of logistics information systems, with specific reference to interfaces between systems.

SECOND YEAR

DWARCE2: WAREHOUSING AND MATERIALS HANDLING

The purpose of this module is to provide the student with warehouse management principles and processes. This will give the student competencies in warehouse management to following a total systems approach and the correct application of and adherence to principles and processes.

DTOPCE2: TRANSPORTATION OPERATIONS MANAGEMENT

The purpose of this module is to develop competencies in the management and application of transport management principles and processes in the workplace through the correct application of and adherence to management principles and transport legislation in the workplace.

DSUPCE2: LOGISTICS AND SUPPLY CHAIN STRATEGY FORMULATION

The purpose of this module is to develop an understanding of the role, importance and nature of logistics planning and strategy formulation from an integrated supply chain management perspective. This module will provide the student with the competency to formulate

a mission statement for a company and take part in the planning and strategy formulation of a company.

DTACCE2: **TACTICAL LOGISTICS MANAGEMENT**

The purpose of this module is to introduce tactical logistics management on various levels of management. This module will assist the student with key financial aspects of logistics and supply chain management and customer service as an important output of the logistics system.

DVINCE2: **INVENTORY MANAGEMENT**

The purpose of this module is to develop competencies in the management and application of inventory management processes and systems in the workplace to maximise customer service levels, reduce the investment in inventory and the associated costs.

THIRD YEAR

DAUDCE3: **LOGISTICS AUDIT REPORT (Compulsory)**

The purpose of this module is to enable the student to compile a well-structured research project in logistics and to provide an opportunity to apply the knowledge gained through experience-based learning.

Select three of the remaining four modules.

DTEMCE3: **TEMPERATURE CONTROLLED SUPPLY CHAIN MANAGEMENT**

The purpose of this module is to provide the student with knowledge and competencies to manage a temperature-controlled supply chain.

DMANCE3: **DEMAND PLANNING**

The purpose of this module is to highlight the importance of demand planning at strategic, tactical and operational level in logistics and to

develop competencies in the management and application of demand planning processes and mechanisms.

DINTCE3: INTERNATIONAL LOGISTICS MANAGEMENT

The purpose of this module is to introduce the student to the important role that logistics management fulfils in the international trade. It will enable students to apply the knowledge of the mechanism of international trade and to provide rational explanations of the underlying concepts.

DPROCE3: LOGISTICS PROJECT MANAGEMENT

The purpose of this module is to develop competencies in the management and application of project management processes and mechanisms in the workplace through the correct application of project management techniques and applicable knowledge management in the logistics workplace.

PLEASE NOTE: THE UNIVERSITY RESERVES THE RIGHT TO AMEND ENROLMENT REQUIREMENTS, TIMETABLE AND PROGRAMME CONTENTS AS AND WHEN THE NEED ARISES, WITHOUT PRIOR NOTICE.

APPLICATION AND REGISTRATION PROCESS

Step 1: How to apply?

ONLINE APPLICATION DATE

1 September 2020 – 22 January 2021
