Year Completed: 2008

Job title: Engineering Technologist

Job description

Designing of civil and structural elements; Compiling tender documents and tender adjudication; Project management and construction monitoring; scheduling and chairing project meetings; Evaluation of payment certificates and contractual claims.

“Civil Engineering as a career choice has endless opportunities in that it warrants one’s exposure to various fields through its many sub-disciplines and enables one to contribute to the country’s economy and infrastructure development. To also bear in mind is a greater need to learn from our mentors and own the knowledge to ensure continuance of the profession, research and development and innovation when they leave the profession.”
