UNIVERSITY OF JOHANNESBURG

The Institute of Chartered I.T Professionals (ICITP), in partnership with The University Of Johannesburg (UJ) presents:

IT INDUSTRY CERTIFICATION FOR MATRICULANTS THAT "PASSED" CAT/IT AS A SUBJECT IN MATRIC

CERTIFIED COMPUTER END-USER PRACTITIONER

INTRODUCTION

Many young South Africans are excluded from economic activity, and as a result suffer disproportionately from unemployment, discouragement and economic marginalization. High youth unemployment means young people are not gaining the skills or experience needed to drive the economy forward. This lack of skills and experience can easily become an impediment to employment, thereby having long-term adverse effects on the individual and the economy.

In response to the high young unemployment rate in South Africa especially in the IT industry, the Institute of Chartered IT Professionals after vetting the matric CAT (Computer Applications Technology) and IT (Information Technology) subject contents / curriculum found that these candidates are qualified and eligible to be entry-level practitioners in the IT sector.

Therefore, candidates who pass any of the two subjects (Computer Applications Technology or Information Technology) at matric may now register and apply for Certified Computer End-User Practitioner, South Africa- CCEUP (SA) certification from the Institute of Chartered IT Professionals (ICITP).

The South African Government has implemented an incentive aimed at encouraging employers to hire young and less experienced work seekers, as stated in the National Development Plan.

CCEUP (SA): Certified Computer End-User Practitioner, South Africa Entry –Level I.T Industry Credential and Work Readiness Certification

The Institute of Chartered IT Professionals- ICITP®,

is a non- profit, public benefit organization, the prestigious professional body for the Information Technology Industry/ sector in South Africa.

ICITP is a recognized professional body by SAQA (South African Qualifications Authority) according to the NQF Act of 2008.

In response to the high youth unemployment rate and preparation of our youths for the 4th Industrial Revolution (4IR), the Institute of Chartered IT Professionals in partnership with the University of Johannesburg (UJ) after vigorously vetting and researching the CAT (Computer Applications Technology) /IT (Information Technology) curriculums for matriculants in Grade 12 (High School), found that the candidates are eligible for Entry Level Practitioner status in the IT industry.

ICITP developed a solution to reduce youth unemployment and empower young South Africans to be able to participate in the nation's economic activities through the Introduction of a competency based and work readiness IT industry certification called CCEUP (SA) - (CERTIFIED COMPUTER END USER PRACTITIONER, SOUTH AFRICA). The aim of this certification is to enable youth who completed and passed CAT/IT in matric to gain access to the job market, and/or start their own businesses providing End-User Support Services.

CCEUP (SA) CERTIFICATION

is a practical, work-ready foundational certification. This entry-level IT certification offers a solid foundation in Information Technology practice and shows the holder's capability as a competent digital practitioner. CCEUP (SA) is accessible to candidates with Information Technology fundamental skills and with the ability to provide elementary support to end-users.

CCEUP (SA) certificate holders play a key support role for computer end-users in any organisation, they can competently work across all sectors of the economy to improve organizational productivity and efficiency. CCEUP (SA) certification enables the candidate to occupy diverse roles including:

- End-Users Support
- Data Capturer
- Receptionist
- Office Secretary
- Office Administrator
- Personal Assistant
- Messenger (Public/ Private Sector)

- Administrative Officer
- Admin Clerk
- Applications support
- Help desk operator
- Maintenance support
- Desktop Publisher
- Software Developer
- Programmer

In South Africa, our communities are facing 65% youth unemployment in some areas. And with schools struggling to leverage technology to embrace mastery- and inquiry-based learning techniques, there is a risk of a growing digital divide and even higher youth unemployment in the future. The CCEUP (SA) certification validates one's ability to effectively use digital era computer applications in a business environment, prove one's capability to input, retrieve and communicate information using technology driven devices and ensure that the certificate holder can adapt to new technologies rapidly and with ease.

Responsibilities of a CCEUP (SA)

End user support technicians are the first line of help when customers encounter problems or defects with products and programs. They answer telephone inquiries, respond to emails and perform in-person support sessions. They have a combination of technical and interpersonal attributes. Good judgement, clear communication skills and the ability to help others are their most integral qualities.

ICITP professional certifications are recognised by both the private and public sector in South Africa and internationally: www.vue.com/icitp .

ICITP ADVISORY BOARD AND CERTIFIED MEMBERS OF THE INSTITUTE

A quick note from our meeting with the department of basic education's chief education specialist, Carina Labuscagne for CAT/IT.

Upon an insightful presentation about the CCEUP(SA) Digital Certification, The Department of Basic Education (DBE) expressed excitement & enthusiasm in learning that the CAT/IT curriculum at matric level is gaining adequate recognition and the endorsement that it deserves from the industry. This simply makes it more valuable for those that have completed and those that are currently taking CAT/IT as a subject.

Previously CAT was on the non-designated list of subjects for schools, according to the Department of Basic Education (DBE), as of October 2018, that has changed and will certainly be beneficial for more schools and students to adopt the subject, pass it and acquire an industry certification endorsed by the Institute of chartered IT Professionals in preparation for the fourth industrial revolution.

Seun Adegelu Chief Executive of ICITP(SA)

John Arends Deputy chairperson Advisory committee ICITP(SA)

Carina Labuscagne Department of Basic Education's Chief Education Specialist for CAT/IT

Clement Mokoka. D President/Chairperson Board of Directors of ICITP(SA)

3 day MasterClass followed by Certification/Induction ceremony, both held at the University of Johannesburg, Doornfontein Campus

Students who passed CAT/IT at matric who have successfully applied for the CCEUP (SA) certification and has received a letter of invitation from the Institute of Chartered IT Professionals are invited to the Induction into the Profession Ceremony at the University of Johannesburg, Doornfontein Campus. Date and Venue will be given during the certification process.

The induction ceremony will feature the "Information Technology" and "The Pledge of the Information Technology Professional." The Induction into the Profession initiation includes educating the awardees about the IT profession in South Africa. Students take an oath similar to the Hippocratic Oath taken by medical doctors.

Online registration is required; visit: **http://www.icitp.org.za/cceup-sa/**

The final registration date will be given during the application process.
