

Apply now for our graduate programme!

Closing date for applications is **27 August 2021**

We are looking for graduates who will bring new ideas and fresh approaches to help us discover even safer, cleaner, and more responsible ways of working that focus on the wellbeing of our people at work and in our host communities.

Successful candidates will join a two-year graduate development programme at Anglo American's Kumba Iron Ore or Anglo American Platinum. The programme offers participants the chance to make a difference, working on real projects and the opportunity to work across open cut or underground mining. It is designed to recognise your individuality, springboard your career, harness your natural talent and help you develop lasting networks.

How to apply

If you would like to apply to become part of our graduate programme, please complete our online application form. You can access the application form for the graduate discipline of your choice by logging onto to <https://www.angloamerican.com/careers/job-opportunities/apply> and search for role by inserting the job reference number. You will be able to upload your CV and other relevant documentation.

More about Anglo American

At Anglo American, we are committed to making lasting positive change for our employees, host communities, consumers and our planet. We enable both high performance and purposeful action as we aim to re-imagine mining to improve people's lives. We deliver the metals and minerals that make modern life possible, contributing to the production of anything from mobile phones to medicines. Find out more at www.angloamerican.com.

What qualifies you to apply? You need to have...

- Completed an undergraduate, honours or master's degree in disciplines relevant to the available roles within the past two years or be due to complete by January 2022.
- No more than two years' relevant work experience.
- Excellent academics.
- Demonstrated that you are a team player with strong leadership potential.
- Demonstrated drive, ambition and a passion for challenging work.
- Actively participate in campus and community life.

Inclusion and diversity

We strive to create an inclusive environment for all employees. Candidates from different backgrounds are encouraged to apply for all vacant positions.

Job description

As a graduate within Anglo American, you will learn how to assist in delivering best practice support and have a proactive approach to safety, ensuring compliance with all safety systems and legislation. The role will have a strong focus on a specific discipline. You will facilitate effective communication between all relevant stakeholders and ensure that regular updates are completed in a timely manner. Graduate opportunities are rotational, which means, you will gain experience in a variety of areas.

Background checks

Successful candidates will be required to complete background screening which will include validation of qualifications and medical checks.

We are committed to your safety

Nothing is more important to us than ensuring you return home safely after a day's work. To make that happen, we have the most rigorous safety standards in the industry and are continually investing in new technologies – from drones to data analytics – to help us make mining safer.
