1. PURPOSE

The purpose of the BCom (Transport and Logistics Management) qualification is to provide qualifying students with applied competencies in the understanding and interpreting of transport and logistics management principles, in preparation for a career in the transport and logistics field and to provide a basis for further learning.

The student should be able to reflect on the study material in the context of a transport or logistics organisation, or function of a company, and to assess decisions impacting transport and logistics management.

The BCom (Transport and Logistics Management) enables students to specialise in logistics and transportation management.

2. GENERAL

The Department of Transport and Supply Chain Management offers the following degree:

BCom (Transport and Logistics Management) - B34TLQ

After completion of the BCom degree, advanced study may be undertaken in BCom Honours.

The Department also provides the opportunity to obtain MCom, DCom and DPhil degrees in Logistics Management or Transport Economics, in which research is undertaken under guidance of a study leader appointed by the department.

3. COMPOSITION OF THE PROGRAMME

The programme has 27 semester modules which should all be completed. The programme is assembled according to certain requirements. A number of compulsory modules are included and in some instances it is prescribed that modules or combinations of modules, must be completed in a specified order. The reason for this is to ensure the necessary frame of reference before continuing with the next modules.

4. METHOD OF PRESENTATION

The following is valid for each of the modules:

Class discussions: at least fourteen meetings per module, following a set timetable.

Two semester assessments and one sick semester assessment: a written assessment of between two to three hours, following a pre set timetable.

Task or assignment: varies from module to module.

Examination: a written examination paper of between two to three hours during the official university examination period, following a pre set timetable.

5. SUCCESS CRITERIA

The pass mark for each module is 50%. The degree is awarded with distinction if the average weighted mark of the 27 modules is at least 75%. The mark for each module consists of two equally weighted components, viz. the examination mark and the semester mark. A minimum semester mark of 40% is required for entry to the exam. The semester mark of each module comprises of the semester assessment and the task/assignment, and also other possible components, and is elucidated in the learning guide for each module.
