

# INTERN OPPORTUNITY

**How would you like the chance to train young people in basic design in a fully kitted-out maker space equipped with CAD software and two 3D printers?**

- Are you an Engineering, Technology, Design or Information Science student?
- Do you have an interest in 3D printing, computer aided design and audio visual equipment?
- Do you have an interest in makerspaces and making?
- Do you enjoy working with high school students and young people?

Then this opportunity is for you!

We are looking for an intern to work 12 hours per week at Rosa Parks Library and Innovation Studio.

Please e-mail your Curriculum Vitae to Chris du Plessis at [duplessisc@america.gov](mailto:duplessisc@america.gov) by March 9, 2018.

Rosa Parks Library and Innovation Studio is an American Space in Soweto, Johannesburg, funded by the U.S. Consulate General in Johannesburg. It forms part of a global network of almost 500 such spaces. The Office of American Spaces in the U.S. State Department in Washington, D.C., provides us with strategic direction and guidance, but the library is operated and managed by the U.S. Consulate General.

We strive to offer a welcoming, inspiring environment with modern technology where our members can explore and be inspired by new ideas, skills and opportunities. We hope to build bridges between the people of South Africa and the United States through free access to information and open dialogue. We serve as a developmental platform for people, projects and products, offering room to contemplate, coordinate and fabricate, and we enhance training and the transfer of both hard and soft skills.

*Please note, this is not a permanent position at the library. Rather, it is a temporary, contract intern position through a third party human resources company.*
