

Short Learning Programme (SLP)

GREEN BUILDING INSTITUTIONAL ARRANGEMENTS

Webinar: Legislation, Regulation, Policies and Systems

FACULTY OF ENGINEERING AND THE BUILT ENVIRONMENT

Why?

Construction activity consumes a substantial amount of natural resources. One of the strategies adopted by the construction industry to improve the environmental performance of its products is the application of green building principles. Green buildings aim to minimise environmental impact while improving indoor environmental health for the benefit of occupants.

Who should attend?

- Students: Architecture, Building Design, Civil Engineering, Built Environment, Construction
- Government and Municipal officials: Department of Planning, Department of Environment, Department of Human Settlement
- Business: Design Consultants, Architects, Building Constructors, Facilities Managers
