

Mandatory vaccination – Exemption applications open until 9 March 2022

Dear UJ Student,

Following the approval by Council, and as communicated, the University of Johannesburg is now a mandatory vaccination site. As such, compliance with the [Policy and the Implementation Protocol](#) is mandatory. We would like to thank our students who have taken the opportunity to **vaccinate and upload their vaccination certificates**.

Students who have not vaccinated and/or uploaded their vaccination certificates have been allowed to apply for an exemption. The closing date for applications for exemption has been extended on several occasions.

Students who still intend to apply for exemption can do so via the online system <https://ulink.uj.ac.za/ujvac> by no later than **Wednesday, 9 March 2022**. After this date, no further requests/applications for exemptions will be considered.

Students who do not adhere to the deadlines shall not be permitted on campus and risk being deregistered.
