Postgraduate Diploma In Clinical Simulation For Healthcare Professionals

Course Description

The Postgraduate Diploma in Clinical Simulation develops skilled healthcare educators in the integration and application of clinical simulation theories and practices in their own teaching, learning, assessment and research.

This requires problem-solving skills and critical, reflective thinking, as well as the ability to report on clinical simulated teaching principles in ways appropriate to the relevant academic and disciplinary discourse.

The graduate will be able to competently apply an integration of theoretical principles, proven techniques, practical experience and appropriate skills into their own teaching practices.

Mode of Delivery: Distance Education - Online

Full-Time: Minimum 1 Year Full-Time / Maximum 2 Years Full-Time **Part-Time:** Minimum 2 Years Part-Time / Maximum 3 Years Part-Time

Course Outcomes

- Demonstrate a deep understanding of the development and application of simulation as a strategy for health care education.
- Apply adult learning theories to the construction and application of simulation-based learning experiences.
- Describe and critically appraise current simulation technologies and modalities with regard to their value and application.
- Design and implement simulation-based learning experiences using appropriate teaching, learning and assessment strategies.
- Describe the core principles associated with the management of simulation facilities and related resources.
- Critically appraise research methodologies and approaches used in simulation contexts.

Minimum Admission Requirements

- An appropriate Health Sciences related Bachelor's Degree or Advanced Diploma or equivalent qualification (a minimum of an NQF level 7).
- The candidate should have experience in health professions education, with a minimum of 2 years' experience in their relevant field. This includes clinical or profession specific experience
