

MASTERS IN SUSTAINABLE URBAN PLANNING AND DEVELOPMENT JOINT (MSUPD)

The purpose of the qualification is to provide learners with advanced knowledge of Sustainable Urban Planning and Development and equip them with skills to solve sustainable urban problems. This qualification will produce built environment professionals specializing in the sustainable planning, design, development and management of urban centers. Upon the completion of this qualification, learners will be able to:

- Apply sustainable development principles to urban development to benefit societies at large.
- Develop an advanced capability to independently conduct fundamental urban issues related research.

Programme Coordinator: Dr Eric N. Makoni (emakoni@uj.ac.za)
