

MASTERS IN SUSTAINABLE URBAN PLANNING AND DEVELOPMENT (MSUPD)

The purpose of this interdisciplinary Programme is to develop built environment professionals specializing in the sustainable planning, design, development and management of urban centers. These graduates will acquire advanced abilities in applying sustainable development principles to urban development to benefit societies. One of the main objectives is to develop an advanced capability to independently conduct fundamental urban issues related research and as such promote a lifelong learning approach.

Programme Coordinator: Dr Jackson Sebola (jsebola@uj.ac.za)
