

Graduation Programme

The Future. Reimagined.

UNIVERSITY
OF
JOHANNESBURG

Dear UJ Graduates

Your journey to this point has been an important lesson in leadership. As I have iterated often, learning, knowledge and leadership are an essential mix and those who do not know, cannot lead. Our objective has been to empower you as leaders who are primed to face the challenges of the 4IR and explore the opportunities that this new era presents both locally and internationally. This is an exciting adventure, let me assure you that the world you are entering is abundant with opportunities, and of course, challenges.

This graduation is rather special. Though we still find ourselves in a strange setting, still fighting an invisible and relatively unknown threat and still gripped with a sense of uncertainty, there does seem to be a glimmer of hope on the horizon. This represents our first cohort of in-person graduations in two years. As we celebrate your attainment of a major milestone, we are cognisant of the sheer resilience you have demonstrated against a tumultuous context – one defined by loss, anguish and seismic shifts in the way we live and work. A graduation ceremony is an important precursor to the next chapter of your lives. It is warming to be able to celebrate this achievement today with you in person as opposed to the digital modes that have defined much of the pandemic so far.

I want to take this opportunity to remind you that as a graduate, you join a small elite in our country. This is really something to celebrate. Though the odds seemed stacked against you, you persevered and not have the potential to address some of the greatest scourges of our time. You have chosen well – a qualification from UJ will hold you in good stead!

UJ has grown into a world-class, internationally recognised university with

more than 50 000 students registered. Our global stature and academic depth and footprints are acknowledged by reputable higher education ranking systems in the world. You emerge today as the world including us in South Africa, is in a period of deep change. UJ is leading the charge in the Fourth Industrial Revolution (4IR) and creating a cohort of graduates who are agile, curious and able to be active participants in a technology driven and digital environment.

At UJ, you have encountered some of the finest South African and international academic minds. You have participated in technology-rich learning, which compares favourably to the very best in global higher education.

We welcome you as a new member of the global UJ alumni community where you will join a worldwide body of professionals, many of whom are leaders in their fields. I encourage you to join the UJ Alumni Network and become an active member of the University Convocation. By staying actively engaged with UJ, you can make a real contribution to our academic projects and to those who will study at UJ after you.

It is exciting to once again commence this time-honoured tradition. Congratulations on this inspiring achievement and the best of luck with your next chapter!

Semper sint in flore!

English

Let us rejoice, therefore,
While we are young.
After a pleasant youth
After a troubling old age
The earth will have us.
Long live the academy!
Long live the professors!
Long live each student;
Long live the whole fraternity;
For ever may they flourish!

7. Doctor Technologiae (DTech): Biomedical Technology

Heine, Lee (Biomedical Technology)

Thesis: Prevalence of Diarrhoea-Causing Enteric Pathogens and Antimicrobial Resistance of Potentially Pathogenic Bacteria Isolated from Children under Five Years

Supervisor: Prof TG Barnard

Co-supervisor: Prof N Potgieter

Heine, Lee (DTech)

Lee Heine was awarded her master's degree (*cum laude*) in 2007 and completed her doctorate at the University of Johannesburg in 2021. She is an HPCSA medical technologist board-registered microbiologist with experience at both private and public pathology laboratories. She specialises in medical microbiology and have taught this, along with several biomedical sciences related subjects, at two South African universities. While completing her doctorate, she worked as a research assistant for the Water and Health Research Centre and as a part-time lecturer at the University of Johannesburg. She also acted as co-supervisor for a master's study in biomedical science.

In low-income countries, diarrhoea is a significant cause of morbidity and mortality worldwide with most deaths occurring in children under the age of five years. The aim of the study was to investigate the prevalence of enteric pathogens in stools of children under the age of five years presenting with diarrhoea at clinics and hospitals in the Limpopo province, and to evaluate the antimicrobial susceptibility of the pathogenic bacteria. Using the BioFire® Film Array® GI Panel to determine the prevalence of diarrhoea-causing enteric pathogens, 82.2% of the samples tested positive for at least one pathogen and 57.3% tested positive for between two and seven different pathogens. The antimicrobial susceptibility of bacterial pathogens showed most were multidrug resistant with only thirteen isolates classified as extensively drug resistant. The study highlighted the need to better understand the co-occurrence and potential co-infection

of pathogenic microorganisms, and the bacterial antibiotic resistance in this area.

Supervisor: Prof TG Barnard

Co-supervisor: Prof N Potgieter

National Anthem of South Africa

Nkosi sikelel' Afrika
Maluphakanyisw' uphondo lwayo,

Yizwa imithandazo yethu,
Nkosi sikelela, thina lusapho lwayo.

Morena boloka setjhaba sa heso,
O fedise dintwa le matshwenyeho,
O se boloke, O se boloke setjhaba sa heso,
Setjhaba sa South Afrika - South Afrika.

Uit die blou van onse hemel,
Uit die diepte van ons see,
Oor ons ewige gebergtes,
Waar die kranse antwoord gee,

Sounds the call to come together,
And united we shall stand,
Let us live and strive for freedom,
In South Africa our land.
