Statement of Responsibility of the Members of Council

FOR THE YEAR ENDED 31 DECEMBER 2021

The Council is responsible for the maintenance of adequate accounting records and preparation, integrity and fair presentation of the consolidated and separate financial statements of the University of Johannesburg and its subsidiaries. The auditors are responsible for reporting on the fair presentation of the consolidated and separate annual financial statements.

The consolidated and separate financial statements presented on pages 480 to 576 of this Annual Report for 2021 have been prepared in accordance with International Financial Reporting Standards, and the requirements of the Higher Education Act of South Africa as amended, and include amounts based on judgements and estimates made by management. The Council has also prepared other information as required to be included in this Annual Report and is responsible for both its accuracy and consistency with the consolidated and separate financial statements.

The going concern basis has been adopted in the preparation of the consolidated and separate financial statements. The Council has no reason to believe that the University of Johannesburg and its subsidiaries is not a going concern in the foreseeable future based on forecasts and available cash resources. The viability of the institution is supported by the content of the consolidated and separate annual financial statements.

The consolidated and separate annual financial statements have been audited by SNG Grant Thornton, who were given unrestricted access to all financial records and related data, including minutes of all meetings of the Council and its committees. The Council believes that all representations made to the independent auditors during their audit are valid and appropriate.

APPROVAL OF THE CONSOLIDATED AND SEPARATE ANNUAL FINANCIAL STATEMENTS

The consolidated and separate financial statements presented on pages 480 to 576 of this Annual Report were approved by the Council on 23 June 2022 and signed on its behalf by:

MS Teke

Chair of Council

T Marwala (Prof)

Vice-Chancellor and Principal

N Mamorare

Independent auditor's report to the Minister of higher Education and Training and the Council of the University of Johannesburg

Report on the audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of the University of Johannesburg and its subsidiaries (the group) set out on pages 480 to 573, which comprise the consolidated and separate statement of financial position as at 31 December 2021, the consolidated and separate statement of profit or loss and other comprehensive income, statement of changes in equity, and statement of cash flows for the year then ended, as well as notes to the consolidated and separate financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated and separate financial statements present fairly, in all material respects, the financial position of the group as at 31 December 2021 and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Higher Education Act of South Africa, 1997 (Act no.101 of 1997).

Victor Sekese [Chief Executive]
A comprehensive list of all

Basis for opinion

We conducted our audit in accordance with the International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the auditor's responsibilities for the audit of the consolidated and separate financial statements section of our report.

We are independent of the group in accordance with Independent Regulatory Board for Auditors' Code of Professional Conduct for Auditors (IRBA Code) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities in accordance with the IRBA Code and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Code is consistent with the corresponding sections of the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (Including International Independence Standards).

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter

We draw attention to the matter below. Our opinion is not modified in respect of this matter.

Restatement of corresponding figures

As disclosed in note 41 to the financial statements, the corresponding figures for 2020 were restated as a result of errors in the consolidated and separate financial statements of the group at, and for the year ended, 2021.

Other matter

We draw attention to the matter below. Our opinion is not modified in respect of this matter.

Supplementary information

The Department of Higher Education and Training Consolidated Statement of Profit or Loss and Other Comprehensive Income as set out on pages 570 to 573 does not form part of the consolidated and separate financial statements and is presented as additional information. I have not audited this schedules and, accordingly, I do not express an opinion on them.

Responsibilities of the Council for Consolidated and the Separate Financial Statements

The Council, which constitutes the accounting authority, is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with International Financial Reporting Standards and the requirements of the Higher Education Act of South Africa, 1997 (Act no.101 of 1997), and for such internal control as the accounting authority determines is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the accounting authority is responsible for assessing the group's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the accounting authority either intends to liquidate the group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the ISAs will

always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

A further description of our responsibilities for the audit of the consolidated and separate financial statements is included in the annexure to this auditor's report.

Report on the audit of the annual performance report

Introduction and scope

In accordance with the Public Audit Act 25 of 2004 (PAA) and the general notice issued in terms thereof, we have a responsibility to report on the usefulness and reliability of the reported performance information against predetermined objectives for the selected objective presented in the annual performance report. We performed procedures to identify material findings but not to gather evidence to express assurance.

Our procedures address the usefulness and reliability of the reported performance information, which must be based on the university's approved performance planning documents. We have not evaluated the completeness and appropriateness of the performance indicators included in the planning documents. Our procedures do not examine whether the actions taken by the university enabled service delivery. Our procedures do not extend to any disclosures or assertions relating to the extent of achievements in the current year or planned performance strategies and information in respect of future periods that may be included as part of the reported performance information. Accordingly, our findings do not extend to these matters.

We evaluated the usefulness and reliability of the reported performance information in accordance with the criteria developed from the performance management and reporting framework, as defined in the general notice, for the following selected objective presented in the university's annual performance report for the year ended 31 December 2021:

Objective	Pages in the annual performance report
Strategic Objective Two – Excellence in Teaching and Learning	85 –87

We performed procedures to determine whether the reported performance information was consistent with the approved performance planning documents. We performed further procedures to determine whether the indicators and related targets were measurable and relevant, and assessed the reliability of the reported performance information to determine whether it was valid, accurate and complete.

We did not identify any material findings on the usefulness and reliability of the reported performance information for this objective:

Excellence in Teaching and Learning

Other matter

We draw attention to the matter below:

Achievement of planned targets

Refer to the annual performance report on pages xx to xx for information on the achievement of planned targets for the year.

Report on the audit of compliance with legislation

Introduction and scope

In accordance with the PAA and the general notice issued in terms thereof, we have a responsibility to report material findings on the university's compliance with specific matters in key legislation. We performed procedures to identify findings but not to gather evidence to express assurance.

We did not identify any material findings on compliance with the specific matters in key legislation set out in the general notice issued in terms of the PAA.

Other information

The council is responsible for the other information. The other information comprises the information included in the Annual Report,. The other information does not include the consolidated and separate financial statements, the auditor's report and the selected strategic objective presented in the annual performance report that have been specifically reported in this auditor's report.

Our opinion on the consolidated and separate financial statements and my findings on the reported performance information and compliance with legislation do not cover the other information and we do not express an audit opinion or any form of assurance conclusion on it.

In connection with our audit, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements and the selected objective presented in the annual performance report, or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

We have nothing to report in this regard

Internal Control deficiencies

We considered internal control relevant to our audit of the consolidated and separate financial statements, reported performance information and compliance with applicable legislation; however, our objective was not to express any form of assurance on it.

We did not identify any significant deficiencies in internal control.

Other reports

We draw attention to the following engagements conducted by various parties which had, or could have, an impact on the matters reported in the University's financial statements, reported performance information, compliance with applicable legislation and other related matters. These reports did not form part of our opinion on the consolidated and separate financial statements or our findings on the reported performance information or compliance with legislation.

Annexure – Auditor's responsibility for the audit

As part of an audit in accordance with the ISAs, we exercise professional judgement and maintain professional scepticism throughout our audit of the consolidated and separate financial statements, and the procedures performed on the reported performance information for selected objective and on the group compliance with respect to the selected subject matters.

Financial statements

In addition to our responsibility for the audit of the consolidated and separate financial statements as described in this auditor's report, we also:

- identify and assess the risks of material misstatement of the consolidated and separate financial statements whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient
 and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is
 higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations,
 or the override of internal control
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the group's internal control
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Council, which constitutes the accounting authority
- conclude on the appropriateness of the accounting authority's use of the going concern basis of accounting in the preparation of the financial statements. We also conclude, based on the audit evidence obtained, whether a material uncertainty exists relating to events or conditions that may cast significant doubt on the ability of the University of Johannesburg and its subsidiaries to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements about the material uncertainty or, if such disclosures are inadequate, to modify our opinion on the consolidated and separate financial statements. Our conclusions are based on the information available to us at the date of this auditor's report. However, future events or conditions may cause the the group to cease operating as a going concern
- evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the consolidate notes and disclosures, and determine whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation
- obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated and separate financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

Communication with those charged with governance

We communicate with the accounting authority regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the accounting authority with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to have a bearing on our independence and, where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated to those charged with governance, we determine those matters that were of most significance in the audit of the consolidated and separate financial statements of the current period and are therefore key audit matters. We describe these matters in this auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in this auditor's report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest of such communication.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

1. General information

The consolidated and separate financial statements were authorised for issue by the Council on 23 June 2022.

The University of Johannesburg is a Higher Education Institution governed by the Higher Education Act 1997 (Act no 101 of 1997 as amended) and is domiciled in South Africa. The address of its registered office is Cnr University and Kingsway Road, Auckland Park.

2. Basis of preparation and summary of significant accounting policies

The principal accounting policies adopted by the University of Johannesburg and its subsidiaries are set out below. These policies have been applied consistently to all the years presented, unless otherwise stated. The financial statements are presented in South African Rands (thousands, except where specifically disclosed).

The consolidated and separate financial statements of the University of Johannesburg and its subsidiaries have been prepared in accordance with International Financial Reporting Standards ("IFRS"). The separate financial statements of the University of Johannesburg have been prepared per the requirements of the Minister of Higher Education and Training as prescribed by the Higher Education Act, 1997 (Act No. 101 of 1997) as amended.

The financial statements have been prepared on a historical cost basis, except for the following:

- certain financial assets measured at fair value, and
- defined benefit pension plans plan assets measured at fair value.

The preparation of financial statements in conformity with International Financial Reporting Standards requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the consolidated and separate financial statements are disclosed in note 4.

Going concern

The consolidated and separate financial statements of the University of Johannesburg have been prepared on a going concern basis. Additional information is disclosed in note 38.

2.1 Consolidation

Subsidiaries

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

The group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such remeasurement are recognised in profit or loss.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Inter-entity transactions, balances and unrealised gains on transactions between group entities are eliminated. Unrealised losses are also eliminated. When necessary, amounts reported by subsidiaries have been adjusted to conform with the group's accounting policies.

Disposal of subsidiaries

When the group ceases to have control any retained interest in the entity is remeasured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit/loss.

Associates

Associates are all entities over which the group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting. Under the equity method, the investment is initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the date of acquisition. The group's investment in associates includes goodwill identified on acquisition.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate.

The group's share of post-acquisition profit or loss is recognised in the statements of profit or loss and other comprehensive income, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to share of profit/(loss) of associates in the statements of profit or loss and other comprehensive income.

Profits and losses resulting from upstream and downstream transactions between the group and its associate are recognised in the group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the group.

Dilution gains and losses arising in investments in associates are recognised in the statements of profit or loss and other comprehensive income.

! Foreign currency translation

Functional and presentation currencies

Items included in the consolidated and separate financial statements of each of the University's entities are measured using the currency of the primary economic environment in which the University operates ("the functional currency"). The consolidated and separate financial statements are presented in South African Rand ('R') which is both the University's functional and presentation currency.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

All foreign exchange gains and losses are presented in the statement of profit or loss and comprehensive income within 'other operating expenses'.

2.3 Property, plant and equipment

Recognition

Property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits associated with the asset will flow to the entity; and
- the cost of the asset can be measured reliably.

Initial measurement

An item of property, plant and equipment that qualifies for recognition as an asset is initially measured at its cost.

The cost of an item of property, plant and equipment includes:

- its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.
- any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of
 operating in the manner intended by management.
- the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which an entity incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

Subsequent measurement - Cost model

After initial recognition, property, plant and equipment is measured at cost less any accumulated depreciation and any accumulated impairment losses.

Subsequent expenditure incurred on items of property, plant and equipment is only capitalised to the extent that such expenditure enhances the value or previous capacity of those assets. Repairs and maintenance not deemed to enhance the economic benefit or service potential of items of property, plant and equipment are expensed as incurred.

Where the entity replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Depreciation of an asset commences when it is available for use, and ceases at the earlier of the date that the asset is classified as held for sale, or the date that the asset is derecognised.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line basis to write down the cost less residual value of each asset over its estimated useful life, as follows:

Category	Years
Buildings	80 years
Building Lifts	60 years
Air-conditioner plants	20 years
Electric generators	25 years
Air-conditioners	22 years
Uninterrupted power supply	20 years
Furniture and equipment (including gas boilers)	20 to 22 years
Computer equipment	12 years
Vehicles	17 years
Network and mainframe computer equipment	15 years

Material improvements to buildings, plant and equipment are capitalised while maintenance and repair work is charged to the statement of profit or loss and comprehensive income in the financial period in which it is incurred. It is policy that the university only capitalise assets with a value in excess of R10 000, any other assets are expensed in the year that they are acquired.

The residual values and useful lives of assets are reviewed, and adjusted, if appropriate, at the end of each reporting period.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in operating profit/(loss).

Impairments

The entity tests for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of property, plant and equipment is greater than the estimated recoverable amount, it is written down immediately to its recoverable amount. The resulting impairment loss is recognised immediately in profit or loss, and future depreciation charges are adjusted in future periods to allocate the revised carrying amount, less its residual value, on a systematic basis over its remaining useful life.

Where the estimated impairment loss exceeds the carrying amount of the asset to which it relates, the resulting liability is only recognised if it is required by another standard.

Compensation from third parties for items of property, plant and equipment that were impaired, lost or given up are included in profit or loss when the compensation becomes receivable.

Derecognition

The carrying amount of an item of property, plant and equipment is derecognised when the asset is disposed of or when when no future economic benefits are expected from its use or disposal. The gain or loss arising from the derecognition of an item of property, plant and equipment is included in profit or loss when the item is derecognised. Gains are classified as other gains on the face of the statements of profit or loss and other comprehensive income.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

2.4 Intangible assets

Recognition

An intangible asset is recognised when:

- it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity; and
- the cost of the asset can be measured reliably.

An assessment of the probability of expected future economic benefits that will flow to the entity as a result of the use of an asset is made by management before the asset is recognised. This includes using reasonable and supportive assumptions that represent a best estimate of the set of economic conditions that will exist over the useful life of the asset.

Initial measurement

Intangible assets are initially measured at cost.

Separately acquired assets are initially measured at their purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, and any directly attributable cost of preparing the asset for its intended use.

Artwork acquired by way of a donation is measured at a nominal value plus any costs incurred to bring the specific artwork into

Acquisitions as part of a business combination are initially measured at fair value at acquisition date.

Acquisitions by way of a government grants are initially measured at fair value.

Internally generated goodwill is not recognised as an asset.

The cost of assets acquired through an exchange of assets is measured at fair value at acquisition date unless the exchange lacks commercial substance, or the fair value of neither the asset received nor the asset given up is reliably measurable. The acquired asset is immediately measured in this way even if the asset given up cannot immediately be derecognised. If the acquired asset is not measured at fair value, its cost is measured using the carrying amount of the asset given up.

Internally generated brands, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Subsequent measurement - Cost model

After initial recognition, intangible assets are measured at cost less any accumulated amortisation and any accumulated impairment losses.

Amortisation

An intangible asset is regarded by the entity as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows. Intangible assets with an indefinite useful life are not amortised, but is tested for impairment annually and whenever there is an indication that the intangible asset may be impaired. The intangible asset's determination as having an indefinite useful life is also reviewed annually to determine whether events and circumstances continue to support the indefinite useful life assessment. Reassessing the useful life of an intangible asset as finite rather than indefinite is an indicator that the asset may be impaired.

Artwork has been identified as having an indefinite useful life as there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

For other intangible assets amortisation is allocated on a systematic basis over its useful life. Where an intangible asset has a residual value, the amortisation amount is determined after deducting its residual value.

The residual values of intangible assets are assumed zero unless:

- there is a commitment by a third party to purchase the asset at the end of its useful life; or
- there is an active market for the asset and:
 - residual value can be determined by reference to that market; and
 - it is probable that such a market will exist at the end of the asset's useful life.

Residual values as well as the useful lives of all assets are reviewed annually. Changes in residual values are treated as a change in estimate and treated in accordance with the relevant accounting policies.

The classification of useful lives and amortisation methods for the various classes of assets are as follows:

CategoryYearsSoftware10 years

Artwork Indefinite useful life

Impairments

Assets that have an indefinite useful life, for example artwork, are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less cost to sell, and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

Retirements and disposals

An asset is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The gain or loss on disposal is recognised in profit or loss.

2.5 Financial Assets

Classification

The University classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through profit or loss, and
- those to be measured at amortised cost.

The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

a) Fair value financial assets through profit and loss

The University classifies the financial assets as fair value through profit or loss, as the cash flows from the instruments are not solely payments of principle and interest. These are included in non-current assets unless the University intends to dispose of the investment within 12 months of the reporting date.

Mandated external investment managers carry out the investment of the University's funds. The funds are managed in three separate Balanced Fund Portfolios. The main objective of these portfolios is long term growth.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

b) Trade and other receivables

The University classifies its financial assets at amortised cost only if both of the following criteria are met:

- the asset is held within a business model with the objective of collecting the contractual cash flows, and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principle and interest on the
 principal outstanding.

These are included in current assets, except for maturities greater than 12 months after the reporting date, which are classified as non-current assets.

The University's trade receivables comprise student receivables, which are amounts due by customers for the services performed in the ordinary course of business. The University holds student receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method.

Other receivables are amounts that generally arise from transactions outside the usual operating activities of the University.

Recognition and measurement

a) Fair value financial assets through profit and loss

Fair value financial assets measured through profit and loss are recognised on the trade date, which is the date that the University commits to purchase or sell the asset. Fair value financial assets measured through profit and loss are initially recognised at fair value plus transaction costs. Fair value financial assets measured through profit and loss are subsequently carried at fair value through profit or loss. Changes in the fair value of financial assets measured at fair value through profit or loss are recognised in other gains/(losses) in the statement of profit or loss and other comprehensive income as applicable.

The fair value of investments is based on quoted closing prices and other appropriate valuation methodologies as this is most representative of fair value in the circumstance.

Dividends on investments are recognised in the statement of profit or loss and comprehensive income as part of other income when the University's right to receive payments is established.

b) Trade and other receivables

Financial assets measured at amortized cost are financial assets held within a business model aimed at holding the asset in order to collect contractual cash flows. Timing of these cash flows is determined in the contract and comprise solely payments of principle and interest. Assets measured at amortized cost are initially recognized at fair value plus any directly attributable transaction costs. For trade receivables, the transaction price is deemed to be equal to the fair value. Subsequently, these assets are carried at amortized cost using the effective interest method less any allowance for expected credit losses

Impairment of financial assets

(a) Assets carried at amortised cost

The University applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade and other receivables.

Trade and other receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the non-registration of a student, the failure of a debtor to engage in a repayment plan with the University, and a failure to make contractual payments resulting in a breach of contract.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Impairment losses on trade and other receivables are presented as net impairment losses within the statement of profit or loss and comprehensive income. When a trade or other receivable is uncollectible, it is written off against the provision for impairment.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease is due to a change in assumption, the reversal of the previously recognised impairment loss is recognised in the statement of profit or loss and comprehensive income.

Derecognition

The University derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the University neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the University recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the group retains substantially all the risks and rewards of ownership of a transferred financial asset, the group continues to recognise the financial asset and also recognises a collateral borrowing for the proceeds received. Gains and losses on financial assets measured at amortised cost are recorded in profit and loss.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

2.6 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, together with other short-term, highly liquid investments maturing within 90 days from the date of acquisition that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

Cash and cash equivalents are initially measured at fair value and are subsequently measured at amortised cost. Impairment on cash and cash equivalents is measured on a 12 month expected loss basis and reflects the short maturities of the exposures. The University considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counter parties with whom balances are held.

2.7 Trade and other payables

Trade payables are current obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payable are classified as current liabilities if payment is due within 12 months. If not, they are presented as non-current liabilities.

Recognition

Trade payables are measured initially at fair value and subsequently measured at amortised cost using the effective interest method.

Derecognition

The group derecognises trade payables when, and only when, the group obligations are discharged, cancelled or they expire. The difference between the carrying amount of the liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

2.8 Inventories

Recognition

Inventories are recognised as an asset when

- · it is probable that future economic benefits associated with the item will flow to the entity; and
- the cost of the inventories can be measured reliably.

Measurement

Inventories are initially measured at cost. Cost include:

- · costs of purchase (including taxes, transport, and handling) net of trade discounts received and
- other costs incurred in bringing the inventories to their present location and condition

Inventories are subsequently measured at the lower of cost and net realisable value using the first-in-first-out method.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

2.9 Taxation

The University is exempt from income tax in terms of Section 10(1)(cN) of the Income Tax Act. Subsidiary entities are not exempt from income tax and are liable for normal South African Income Tax.

Current tax assets and liabilities

Current tax for the current and prior periods is, to the extent unpaid, is recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset. Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

2.10 Leases

The University leases various buildings and vehicles. Rental contracts are typically made for fixed periods of 6 months to 4 years. Contracts may contain both lease and non-lease components. The University allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the University is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Liabilities arising from a lease are initially measured on a net present value basis. Lease liabilities include the net present value of the following lease payments:

- · fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- · the exercise price of a purchase option if the University is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the University exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the University, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are initially measured at cost comprising the following:

- the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received;
- · any initial direct costs; and
- restoration costs.

Right-of-use assets are subsequetly measured at cost less accumulated depreciation and any accumulated impairment losses.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the University is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Right-of-use assets impairment loss occurs when the cash flows expected to be generated from an asset over its useful life can no longer support the carrying value of that asset. When this occurs, the carrying value of the asset is reduced to its fair value.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less, with no expectation of renewal. Low-value assets comprise IT equipment and small items of office furniture, which has an individual asset cost below R10 000.

2.11 Provisions and contingencies

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pretax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

Provisions for legal claims are recognised when the University has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

A contingent liability is:

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- a present obligation that arises from past events but is not recognised because it is not probable that an outflow of
 resources embodying economic benefits will be required to settle the obligation, or the amount of the obligation cannot
 be measured with sufficient reliability.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

Contingent assets and liabilities are not recognised, but details are disclosed in the notes to the annual financial statements.

2.12 Revenue

Revenue mainly comprises the fair value of the consideration received or receivable for the rendering of services in the ordinary course of the University's activities. Revenue is shown net of value-added tax, rebates and discounts and after eliminating internal income within the group.

To determine whether to recognise revenue, the University follows a 5-step process:

- 1) Identifying the contract with a customer
- 2) Identifying the performance obligations
- 3) Determining the transaction price
- 4) Allocating the transaction price to the performance obligations
- 5) Recognising revenue when/as performance obligation(s) are satisfied.

The University recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the University and when specific criteria have been met for each of the University's activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the activity have been resolved.

Fees are based on the fee book, standard tuition and residence fee, which is approved by "council". There are no significant judgements applied in the determination of revenue.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Tuition and other fee income

Revenue from tuition, other related fees and residence fees, is recognised over time in the accounting period in which the service relates. When the University is not able to reasonably measure the outcome of the obligation under the contract but expects to recover the costs incurred in satisfying the obligations to date, revenue shall be recognised only to the extent that expenses incurred are eligible to be recovered. Deposits and over payments provided by prospective students are treated as current liabilities until the amount is billed as due.

State appropriations - subsidies and grants

State subsidies and grants for general purposes are recognised as revenue in the financial year to which the subsidy relates. Subsidies for specific purposes, e.g. capital expenditure, are brought into the appropriate fund at the time they are available for expenditure for the purpose provided. However, if the funding is provided in advance of the specified requirement (i.e. the University does not have immediate entitlement to it), the relevant amount is retained as a liability until the University has complied with all the conditions attached to the construction of the asset, after which the grant is deducted from the carrying amount of the asset. Subsidies and grants are in the scope of IAS 20.

Research income

a) Research income in the scope of IAS 20

Revenue is recognised in the financial period in which the University becomes entitled to the use of those funds. Funds in the possession of the University that it cannot use until some specified future period or occurrence are recognised upon receipt and thereafter are held in a reserve fund until the financial period in which the funds may be used.

Research income is recognised and accounted under IAS 20.

b) Research income in the scope of IFRS 15

Research income within the scope of IFRS 15 is recognised over time. The amount of research income in the scope of IFRS 15 is not material.

2.13 Donations

Bursary and research donations are recognised on receipt of contract. These donations are included in 'other operating income' in the statement of profit or loss and comprehensive income and/or in 'student deposits and accounts in credit' in the statement of financial position, depending on the contract.

2.14 Other income

Occasional sales and services are recognised in the period in which they accrue. Income from such sales and services are included in 'other operating income' in the statement of profit or loss and comprehensive income.

2.15 Dividends and interest receivable

Dividends are recognised when the right to receive payment is established. Interest income is recognised in profit on a time proportion basis using the effective interest rate method.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

2.16 Income received for designated purposes

Income received for designated purposes may arise from contracts, grants, donations and income on specifically purposed endowments. In all cases, any such revenue or other operating income is recognised in the financial period in which the University becomes entitled to the use of those funds. Funds in the possession of the University that it cannot use until some specified future period or occurrence are recognised upon receipt and are thereafter held in a reserve fund until the financial period in which the funds may be used.

There are grants with no specific conditions in relation to either the expense they aim to compensate, the period in which they need to be spent or conditions to repay when certain conditions are not fulfilled, etc.

Private gifts, grants and donations with no specific condition in relation to either the expenses they aim to compensate, the period in which they need to be spent or conditions to repay when certain conditions are not fulfilled, etc. but with stipulation that the grant should be used to compensate certain type of expenditure (e.g. bursaries, research - whether in general of within certain areas) are recognised as income at the fair value of the consideration received or receivable in the period in which they are received or the University becomes entitled to it.

Any unspent portion of such grant, at the end of the financial year, is transferred on the statement of change in equity to Restricted Funds (separately from unrestricted funds / council controlled funds). When expenditure are incurred in following years, a transfer from these Restricted use Funds is made to unrestricted funds / council controlled funds. Refer note 3 Fund allocation for further details.

2.17 Loans to subsidiaries and associates

Loans to subsidiaries and associates are recognised initially at fair value, net of transaction costs incurred. Loans to subsidiaries and associates are subsequently stated at amortised cost.

Loans to subsidiaries and associates do not have any contractual repayment terms and do not incur interest and are deemed to be payable on demand.

2.18 Finance Income

Finance income is recognised on a time proportion basis, taking account of the principal outstanding and the effective rate over the period to maturity, when it is determined that such income will accrue to the University.

2.19 Employee obligations

Pension obligations

The University operates various pension schemes. The schemes are generally funded through payments to trustee-administered funds, determined by periodic actuarial calculations. The University has both defined benefit and defined contribution plans.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

The University contributes towards the following retirement funds:

- The University of Johannesburg Pension Fund, which has a defined contribution plan portion;
- · The University of Johannesburg Pension Fund, which has a defined benefit plan portion; and
- The University of Johannesburg Provident Fund, which is a defined contribution plan.

A defined contribution plan is a pension plan under which the University makes fixed contributions into a separate entity. The University has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

The retirement funds are managed by Boards of Trustees and are registered in terms of the provisions of the Pension Funds Act.

The University also contributes to risk benefits e.g. funeral, group and disability plan.

These plans cover most of the University's employees. Foreign staff do not belong to any of these funds.

Current service costs, interest costs and expected return on plan assets (to the extent that the plan is funded) is recognised in the statement of profit or loss and comprehensive income, within "personnel" costs.

The liability in respect of defined benefit pension plans is the present value of the defined benefit obligation at the reporting date less the fair value of plan assets, together with adjustments for actuarial gains/losses and past service cost. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined using interest rates of government securities that have terms to maturity approximating the terms of the related liability.

Ownership of surplus in the University's pension fund is addressed by way of the Pension Funds Second Amendment Act. In terms of Paragraph 65 of IAS19, the asset recognised in the University's statement of financial position is the maximum of the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan. In terms of the rules of the fund, all surplus is credited to the Employer Surplus Account.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income in the period in which they arise.

Past-service costs are recognised immediately in profit or loss, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

The liability of the University in respect of the defined contribution portion of the Pension Funds and the Provident Fund is limited to the monthly contributions that the University pays on behalf of its members in terms of their service contracts.

The assets of the various Funds are held independently of the University's assets in separate trustee-administered Funds.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

Post-retirement medical benefits

The University settled its obligation to provide medical benefits to certain employees after retirement by a single deposit into the pension fund on behalf of the employees involved and has no further obligation. These employees were from the ex-Rand Afrikaans University (RAU).

The University provides post-retirement medical aid benefits to certain qualifying employees from the former Technikon Witwatersrand ("TWR") and Vista University ("VISTA"). The University provided a once off voluntary buy-out offer to qualifying employees to transfer their post- retirement medical aid benefit into their current retirement fund. The University has no further obligation for these employees. Provision is made for the unfunded future medical aid contributions of employees and pensioners. Current service costs are charged to the statement profit or loss and of comprehensive income. The current service cost is determined by independent actuaries on an annual basis taking into account the University's funding of the post-employment benefits.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to other comprehensive income in the period in which they arise. Certain employees from the ex-TWR and ex-VISTA are eligible for post-retirement medical benefits. These employees were appointed before certain dates and they are eligible for these benefits in terms of their employment contracts. These conditions were transferred to the University of Johannesburg and its subsidiaries at the time of the merger.

Long service awards

The University awards long service cash payments to qualifying staff as predetermined milestones are reached for uninterrupted service. These cash awards are subject to income tax as prescribed by South African Revenue Services.

2.20 Government grants - Deferred income

Grants from the government are recognised at their value where there is a reasonable assurance that the grant will be received and the University will comply with all attached conditions.

Government grants relating to costs are deferred and recognised in the statement of profit or loss and comprehensive income over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to property, plant and equipment are deducted in calculating the cost of the asset. The grant is carried as a liability in the statement of financial position until the University has complied with all the conditions attached to the purchase or construction of the asset, after which the grant is deducted from the carrying amount of the asset.

2.21 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the statement of profit or loss and comprehensive income over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the University has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Basis of preparation and summary of significant accounting policies continued...

2.22 Deferred Compensation

Deferred compensation is a benefit to exceptional performers identified within the University. The main purpose was for the University to establish a mechanism to position itself to attract and retain talent on a more sustainable basis. The scheme is based on a 3 year withdrawal cycle where the identified employee is required to display consistent achievement, demonstrate exemplary leadership and should be going beyond the call of duty.

3. Fund allocation

Equity is divided into the following categories:

- Utilised funds
- Available funds
 - o Restricted funds
 - o Unrestricted funds
 - Designated/Committed funds
 - Undesignated funds

Utilised funds

These are funds utilised for acquisitions of property, plant and equipment.

Available funds

These funds comprise income received, the use of which is legally beyond the control of the Council. These funds are accounted for under the following headings:

- Available funds, restricted use
 - o National Research Foundation and similar funds restricted use
 - o Endowment funds restricted use
 - o Bursaries and scholarship funds restricted use
 - o Residences funds restricted use
 - o Funds attributable to fair value adjustments restricted use
- · Available funds, unrestricted use

This grouping comprises income and funds that fall under the absolute discretion or control of the Council. Unrestricted use funds are divided into two categories:

a) Designated-use funds

These are funds designated by the Council for identified purposes. Until such designated amounts are used for the identified purpose, they are disclosed but identified separately as part of "unrestricted funds". Under the grouping "Designated-use funds" a further category is used, namely "Committed funds", this involves funds for projects and initiatives approved by the Council. Designated-use funds are accounted for under the following headings:

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Fund allocation continued...

- · Designated funds
 - o Personal research funds
 - o Departmental reserve funds
 - o Departmental bursaries funds
 - o Division reserve funds
 - o Bursaries and scholarships
 - o Maintenance of property, plant and equipment
 - o Replacement of plant and equipment
 - o Acquisition of library and art collections
- Committed funds
 - o Capital projects
 - o Future pension fund shortfalls
- b) Undesignated -use funds

These comprise funds arising from profit and losses that are available to the Council in its unfettered and absolute control over allocations to fund the activities of the University.

4. Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates and assumptions

The University makes estimates and assumptions concerning the future. These estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Estimates made in accounting will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Provision for post-retirement medical aid liability

Principal actuarial assumptions for the post-retirement medical aid liability for the period ended 31 December 2021 are disclosed in note 20.1. Changes in assumptions may result in changes in the recognised provision for post-retirement medical aid liability.

Depreciation of property, plant and equipment

Depreciation on assets is calculated using the straight-line method to write off the cost less residual values over their estimated useful lives. The residual values and useful lives of assets are reviewed, and adjusted if not appropriate, at each reporting date.

Pension fund obligations

The present value of the pension obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) for pensions include the discount rate. Any changes in these assumptions will impact the carrying amount of pension obligations. The University determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. Other key assumptions for pension obligations are based in part on current market conditions. Additional information is disclosed in note 20.2.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

Critical accounting estimates and judgements continued...

Impairment of related party loan

Management assesses financial assets for impairment at each year end. If the asset's fair value is below cost and considered to be significant or prolonged an impairment will be recognised in the statement of profit or loss and other comprehensive income.

Residual values and useful lives of assets

The residual values and useful lives of assets are reviewed, and adjusted, if appropriate, at the end of each reporting period. Any changes in useful lives, are accounted for as a change in estimate with the depreciation charge adjusted in the current year. The adjustments only apply to assets which still had a book value at the time of adjustment. The useful life of all zero value assets is reviewed on an ongoing basis.

Fair value and provision for credit losses

IFRS 9's impairment requirements use forward-looking information to recognise expected credit losses (ECL). Instruments within the scope of the requirements included loans and other debt-type financial assets measured at amortised cost, trade receivables and loan commitments.

The University considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collect ability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ('Stage 1') and
- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ('Stage 2').

ECL '12-month expected credit losses' are recognised for the first category (ie Stage 1) while 'lifetime expected credit losses' are recognised for the second category (ie Stage 2).

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

5. Changes in accounting policies and disclosures

Standards and Interpretations effective and adopted in the current year

There were no new standards and interpretations effective and adopted in the current year.

The University of Johannesburg and its subsidiaries will apply the following standards on the said effective dates.

	Effective date: Years beginning on or after	Expected impact
IFRS 1 First-time Adoption of International Financial Reporting Standards - Annual Improvements to IFRS Standards 2018–2020: Extension of an optional exemption permitting a subsidiary that becomes a first-time adopter after its parent to measure cumulative translation differences using the amounts reported by its parent, based on the parent's date of transition to IFRSs. A similar election is available to an associate or joint venture.	01 January 2022	Management has performed a high level impact assessment and are not expecting any material changes
IFRS 3 Business Combinations - Reference to the Conceptual Framework: The amendment updates a reference in IFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations.	UT January 2022	Management has performed a high level impact assessment and are not expecting any material changes
IFRS 4 Insurance Contracts - Extension of the Temporary Exemption from Applying IFRS 9 defers the fixed expiry date of the following temporary exemptions from applying IFRS 9 to annual periods beginning on or after 1 January 2023: - A temporary exemption from IFRS 9 granted to an insurer that meets specified criteria; and - An optional accounting policy choice allowing an insurer to apply the overlay approach to designated financial assets when it first applies IFRS 9.	01 January 2022	Management has performed a high level impact assessment and are not expecting any material changes
IFRS 9 Financial Instruments - Annual Improvements to IFRS Standards 2018–2020: The amendment clarifies which fees an entity includes when it applies the '10 per cent' test in assessing whether to derecognise a financial liability.		Management has performed a high level impact assessment and are not expecting any material changes

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Accounting Policies

IFRS 17 Insurance contracts - IFRS 17 creates one accounting model for all insurance contracts in all jurisdictions that apply IFRS.

- IFRS 17 requires an entity to measure insurance contracts using updated estimates and assumptions that reflect the timing of cash flows and take into account any uncertainty relating to insurance contracts.
- The financial statements of an entity will reflect the time value of money in estimated payments required to settle incurred claims.
- Insurance contracts are required to be measured based only on the obligations created by the contracts.
- An entity will be required to recognise profits as an insurance service is delivered, rather than on receipt of premiums.
- This standard replaces IFRS 4 Insurance contracts.

IAS 1 Presentation of Financial Statements - Classification of Liabilities as Current or Noncurrent: Narrow-scope amendments to IAS 1 to clarify how to classify debt and other liabilities as current or non-current.

Disclosure of Accounting Policies: The amendments require companies to disclose their material accounting policy information rather than their signif icant accounting policies, with additional guidance added to the Standard to explain how an entity can identify material accounting policy information with examples of when accounting policy information is likely to be material.

IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors - Definition of Accounting Estimates: The amendments clarify how companies should distinguish changes in accounting policies from changes in accounting estimates, by replacing the definition of a change in accounting estimates with a new definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts

in f inancial statements that are subject to measurement uncertainty". The requirements for recognising the effect of change in accounting prospectively remain unchanged. 01 January 2023

Management has performed a high level impact assessment and are not expecting any material changes

Accounting Policies

IAS 16 Property, Plant and Equipment - Property, Plant and Equipment: Proceeds before Intended Use: The amendments prohibit an entity from deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the cost of producing those items, in profit or loss.

IAS 37 Provisions, Contingent Liabilities and Contingent Assets - Onerous Contracts—Cost of Fulfilling a Contract: The amendments specify which costs should be included in an entity's assessment whether a contract will be loss-making.

Photovoltaic Intellectual Property (Pty) Ltd (PTIP), is an associate of the University. The University's shareholding is 38.4%. The company does not share the same year end as the University, as its year end is 28 February. There were no changes to the University's shareholding in PTIP during 2021 and 2020.

Upon decision of the joint shareholders, PTIP was put in business rescue in May 2018 with a view to orderly wind down the entity and maximise possible return from disposal of assets. The business rescue plan which made provision for the orderly winding down of the company was published and voted on and adopted by the shareholders and creditors on 19 November 2018.

NSFAS and other student receipts	(114,739)	(279,441)	(114,739)	(279,441)
Provision for impairment	(534,567)	(275,282)	(530,862)	(271,416)
Student receivables - net carrying amount	157,613	89,228	157,368	89,287
Other receivables	143,817	458,399	98,964	443,500
Advances and pre-payments	43,184	14,980	41,219	14,927
Deposits	7,922	7,343	2,859	2,280
Staff loans, receivables and advances	90	289	90	289
Value added tax	1,960	7,672	276	6,541
Property transfers	-	184,000	-	184,000
Non-student receivables - net carrying amount	90,661	244,115	54,520	235,463
Non-student receivables	103,153	252,844	66,783	244,109
Less: Provision for impairment	(12,492)	(8,729)	(12,263)	(8,646)
	301,430	547,627	256,332	532,787

The carrying value of student and other receivables approximate their fair values as shown above, due to there short term nature.

Included in Property transfers is R0 (2020: R184 000) due to the process of the purchase of a Media24 building as at 31 December 2020.

The University does not hold any receivables as security.

Refer to note 34 for disclosure relating to the University's exposure to credit risk, as well as a reconciliation of the movement in the provision for impairment of student and other receivables.

Trade receivables

As of 31 December 2021, student receivables of Consolidated R157 613 / University R157 368 (2020: Consolidated R89 228 / University R89 287) were past due date but not impaired. These relate to students for whom there is no recent history of default (i.e. making regular payments). Students whose terms have been negotiated also fall in this category.

The ageing of these receivables is as follows:

Students enrolled in current year	157,613	89,228	157,368	89,287
	157,613	89,228	157,368	89,287

As of 31 December 2020, student receivables of Consolidated R534 567 / University R530 862 (2020: Consolidated R275 282 / University R271 416) were impaired and provided for. The individually impaired student receivables mainly relate to students experiencing financial difficulty with their payments. It is expected that a portion of the student receivables will be recovered from collection efforts both from the University and collection agents.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

T	Consolidated 2021	Consolidated 2020	University 2021	University 2020
Figures in R `000		Restated		Restated
Trade and other receivables continued				
The ageing of this provision is as follows:				
Students enrolled in current year	336,977	117,801	333,272	113,935
Students enrolled in prior year	121,081	82,964	121,081	82,964
Students enrolled more than two years ago	76,509	74,517	76,509	74,517
	534,567	275,282	530,862	271,416
Movements in the provision for impairment of trad	e receivables are as f	ollows:		
At 1 January	271,424	138,434	271,424	138,434
Provision for receivables impaired	332,721	191,954	329,016	191,954
Receivables written off during the year as uncollectable	(69,578)	(58,964)	(69,578)	(58,964)
At 31 December	534,567	271,424	530,862	271,424

The creation and release of the provision for impaired student receivables has been included in other operating expenses in the statement of profit or loss and comprehensive income. Amounts charged to the statement of profit or loss and other comprehensive income are generally written off when there is no expectation of recovering any additional amounts.

Other receivables

As of 31 December 2021, other receivables of Consolidated R103 153 / University R66 783 (2020: Consolidated R252 844 / University R244 109) were fully performing.

	103,153	252,844	66,783	244,109
Past due	31,744	82,404	31,744	82,404
Not past due	71,410	170,440	35,040	161,705

As of 31 December 2021, other trade receivables of Consolidated R12 492 / University R12 263 (2020: Consolidated R8 729 / University R8 646) were impaired and provided for. Due to the nature of these receivables and a history of low defaults credit losses are deemed minimal. Some credit losses have been provided for based on an individual evaluation of individual trade receivables and historical default rates. It was assessed that a portion of the other trade receivables is expected to be recovered.

The ageing of the provision is as follows:

Up to 3 months	3,437	-	3,208	-
> 3 months	9,055	8,729	9,055	8,646
	12,492	8,729	12,263	8,646
Movements in the provision for impairment of other trade receivables are as follows:				
At 1 January	8,729	10,212	8,646	10,129
Provision for impairment	5,374	6,908	5,228	6,908
Receivables written-off during the year	(1,611)	(8,391)	(1,611)	(8,391)
At 31 December	12,492	8,729	12,263	8,646

The creation and release of the provision for impaired other trade receivables has been included in other operating expenses in the statement of profit or loss and other comprehensive income. Amounts charged to the statement of profit or loss and comprehensive income are generally written off when there is no expectation of recovering any additional amounts.

	3,309,610	3,862,192	2,913,698	3,236,096

A register of the investments can be obtained from the University of Johannesburg's Treasury office. The fair value of the investments is based on the closing market values and other appropriate valuation methodologies as at 31 December 2021. The valuations are performed by independent fund managers who manage the University's investments under agreed mandates.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

	Figures in R `000	Consolidated 2021	Consolidated 2020 Restated	University 2021	University 2020 Restated
12.	Cash and cash equivalents				
	Cash at bank and in hand	259,202	159,377	232,781	140,713
	Short term cash deposits	2,545,330	985,153	2,545,330	985,153
	Net cash and cash equivalents	2,804,532	1,144,530	2,778,111	1,125,866

The carrying value of cash and cash equivalents approximates its fair value, due to its short term nature.

The carrying amount of the University's cash and cash equivalents is denominated in South African Rand (R). The maximum exposure to credit risk at the reporting date is the carrying value of cash and cash equivalents. Management of credit risk is disclosed in note 34.

Short term cash deposits are deposits with a maturity term of less than 3 months from acquisition.

The following facilities have been approved by ABSA Bank:

SARS Payable	82,018	54,938	82,018	54,938
Total trade and other payables	1,706,186	1,217,315	1,701,708	1,217,011

The carrying value for trade and other payables above approximate their fair value amount due to its short term nature.

Included in the other payables is Bursaries of Consolidated R1 391 543 / University R1 391 543 (2020: Consolidated R945 573 / University R945 573) and Unallocated deposits of Consolidated R78 579 / University R78 579 (2020: Consolidated R54 690 / University R54 690).

16. Leases

Lease liability				
Current	3,062	3,175	14,087	14,649
Non-current	2,865	5,927	2,865	16,952

The University has leases for buildings and vehicles. With the exception of short-term leases and leases of low-value underlying assets, each lease is reflected in the consolidated statement of financial position as a right-of-use asset and a lease liability. The University classifies its right-of-use assets in a consistent manner to its property, plant and equipment (note 6).

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

Figures in R `000

Leases continued...

The table below describes the nature of the University's leasing activities by type of right-of-use asset recognised in the consolidated statement of financial position:

Right-of-use asset	No. of right- of- use assets leased	Range of remaining term	Average remaining lease term	No. of leases with extension option	No. of leases with option to purchase	No. of leases with termination option
Consolidated						
Buildings	2	2-3 years	1 years	-	-	-
Vehicles	16	3-4 years	2 years	-	-	-
University						
Buildings	3	2-3 years	1 years	-	-	-
Vehicles	16	3-4 years	2 years	-	-	-

The Group has elected not to recognise a lease liability for short term leases (leases with an expected term of 12 months or less) or for leases of low value assets. Payments made under such leases are expensed. (note 27)

The lease liabilities are secured by the related underlying assets. Future minimum lease payments at 31 December 2021 were as follows:

The carrying amounts of short-term borrowings approximate their fair values as the impact of discounting is not significant. The University has no undrawn borrowing facilities.

19. Deferred income

18.

The Department of Higher Education and Training has been through a process commencing with the development of the Macro Infrastructure Framework (MIF) and culminating with detailed one-on-one discussions with each University regarding their funding applications which were uploaded onto the MIF web-based platform. Funds are allocated to each University in line with infrastructure plans based on the principles agreed upon through the MIF.

Retirement benefit assets and obligations continued...

20.1 Post-retirement medical benefits - Wholly unfunded

The University provides post-retirement medical benefits to certain qualifying employees in the form of continued medical aid contributions. Their entitlement to these benefits is dependent on the employee remaining in service until retirement. The accumulated post-retirement medical obligation and annual cost of those benefits is determined annually by independent actuaries. The actuarially determined liability based on the University's current practice of funding a portion of its retirees and in service members medical aid was valued at 31 December 2021.

Present value of the obligation	(220,770)	(177,967)	(220,770)	(177,967)
	(220,770)	(177,967)	(220,770)	(177,967)
Reconciliation of the movement in the defined benefit ob	oligation:

Current service cost	(1,586)	(2,373)	(1,586)	(2,373)
Interest cost	(22,194)	(20,317)	(22,194)	(20,317)
Benefits paid	13,314	12,807	13,314	12,807
	(188,433)	(210,209)	(188,433)	(210,209)
Less remeasurements:				
- (Gain)/loss from change in financial assumptions	27,162	(23,890)	27,162	(23,890)
 (Gain)/loss from change in demographic assumptions 	5,175	(8,352)	5,175	(8,352)
_	32,337	(32,242)	32,337	(32,242)
Present value of obligation: end of the period	(220,770)	(177,967)	(220,770)	(177,967)

The risks faced by UJ as a result of the post-employment healthcare obligation are as follows:

- Inflation: The risk that future CPI Inflation and healthcare cost Inflation are higher than expected and uncontrolled.
- Longevity: The risk that pensioners live longer than expected and thus their healthcare benefit is payable for longer than expected.
- Open-ended, long-term liability: The risk that the liability may be volatile in the future and uncertain.
- Future changes in legislation: The risk that changes to legislation with respect to the post-retirement healthcare liability may increase the liability for UJ.
- Future changes in the tax environment: The risk that changes in the tax legislation governing employee benefits may increase the liability for UJ.
- Perceived inequality by non-eligible employees: The risk that dissatisfaction of employees who are not eligible for a post-employment healthcare subsidy.
- Administration: Administration of this liability poses a burden to UJ.
- Enforcement of eligibility criteria and rules: The risk that eligibility criteria and rules are not strictly or consistently enforced.

UJ's best estimate of contributions and benefits

expected to be paid to the plan during the annual

period beginning after reporting date:

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

	Consolidated 2021	Consolidated 2020	University 2021	University 2020
Figures in R `000		Restated		Restated
Retirement benefit assets and obligations continued	d			
In estimating the unfunded liability for post-employr	ment medical care, t	the following assum	ptions are made:	
Effective date of assumptions	31-Dec-21	31-Dec-20	31-Dec-21	31-Dec-20
Post retirement plan				
Discount rate	12.30%	12.90%	12.30%	12.90%
Health care cost inflation	10.10%	9.10%	10.10%	9.10%
Expected retirement age	65 yrs	65 yrs	65 yrs	65 yrs
CPI Inflation	4.00%	3.50%	4.00%	3.50%

(13,313)

The sensitivity of the defined benefit obligation to changes in the weighted principle assumptions is:

	Impact on defined benefit obligation			
	Change in assumption	Increase in assumption	Decrease in assumption	
Healthcare cost inflation	1,00%	Increase by 10.7%	Deccrease by 9.2%	
Discount rate	1,00%	Decrease by 9.4%	Increase by 11.1%	

Increase by 1 year in assumption Decrease by 1 year in assumption

(12,686)

(13,313)

(12,686)

Expected retirement age Decrease by 3.4% Increase by 3.4%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method has been applied as when calculating the pension liability recognised within the statement of financial position.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

Retirement benefit assets and obligations continued...

20.2 Pension obligations - Wholly funded

The University has established post retirement pension schemes that cover all employees. The assets of the fund are held in an independent trustee administered fund in terms of the Pensions Fund Act of 1956, as amended. The pension fund is valued by independent actuaries on an annual basis using the Projected Unit Credit Method.

The latest full actuarial valuation of the pension fund was performed on the 31 December 2021. Contributions to the provident fund are charged to the statement of profit or loss and comprehensive income in the year in which they are incurred. Refer to note 41 for restatement pertaining to par 65 limit correction.

Retirement benefit assets and obligations continued...

The risks faced by UJ as a result of the defined benefit obligation are as follows:

- Inflation: The risk that future CPI Inflation is higher than expected and uncontrolled. This would lead to greater than expected pension and salary increases which would increase the liability to the University.
- Longevity: The risk that pensioners live longer than expected and thus their healthcare benefit is payable for longer than expected.
- Open-ended, long-term liability: The risk that the liability may be volatile in the future and uncertain.
- Future changes in legislation: The risk that changes to legislation with respect to the post-retirement liability may increase the liability
- Future changes in the tax environment: The risk that changes in the tax legislation governing employee benefits may increase the liability
- Administration: Administration of this liability poses a burden to UJ.

The assets of the University of Johannesburg Defined Benefit Pension Fund were invested as follows:

Cash	2.58%	4.99%	2.58%	4.99%
Equity	41.78%	43.19%	41.78%	43.19%

Pension increase allowance (Other pensioners)	3.03%	2.28%	3.03%	2.28%
UJ's best estimate of contributions expected to be paid to the plan during the annual period beginning after reporting date:	1,217	1,428	1,217	1,428

Sensitivity Analysis

It is important to treat the results of the valuation with a degree of caution, as they are extremely sensitive to the assumptions used

The valuation results set out above are based on a number of assumptions. The value of the liability could turn out to be overstated or understated, depending on the extent to which actual experience differs from the assumptions adopted

We recalculated the liability to show the effect of:

- the discount rate assumption on the defined benefit obligation by adding and subtracting 1% to the discount rate; and
- the inflation assumption on the defined benefit obligation by adding and subtracting 1% to the inflation rate.

20.3 Disability Fund

The University provides post-retirement disability benefits to certain qualifying employees in the form of continued disability contributions. Their entitlement of these benefits continue to the end of the year in which the claimant reached the age of 65 and increase annually. The accumulated disability obligation and annual cost of those benefits is determined annually by independent actuaries. The actuarially determined liability which is reduced by the payments received from reinsurers was valued at 31 December 2021.

Balance at end of the year				
Present value of the obligation	(42,427)	(40,879)	(42,427)	(40,879)
Fair value of plan assets	211,803	180,757	211,803	180,757

Other	0.95%	2.18%	0.95%	2.18%
Total	100 %	100 %	100 %	100 %
Plan assets are valued at the current market value a	ns required by IAS 19 a	as at 31 December 2	2021.	
Claimants				
Number of members	19	21	19	21
Annual benefit	7,836	9,022	7,836	9,022
Annual reinsured benefit	1,074	1,259	1,074	1,259
Benefit weighted average service	56.8 yrs	58.2 yrs	56.8 yrs	58.2 yrs
Effective date of assumptions	31 Dec 2021	31 Dec 2020	31 Dec 2021	31 Dec 2020
The principal assumptions used for account purposes were as follows:	ing			
General inflation rate	4.10%	2.40%	4.10%	2.40%
Discount rate	7.50%	5.60%	7.50%	5.60%
Expected increases in benefits	5.10%	3.40%	5.10%	3.40%

The University's best estimate is that no contributions are expected to be paid to the plan during the annual period beginning after reporting date.

The sensitivity of the defined benefit obligation to changes in the weighted principle assumptions is:

	Impact on defined benefit obligation				
	Change in assumption	Increase in assumption	Decrease in assumption		
Inflation rate	1.00%	Increase by 5,3%	Decrease by 4,9%		
Discount rate	1.00%	Decrease by 4,2%	Increase by 4,6%		

The fund is not registered with the FSB.

The benefits of the fund are payable to the current claimants under the fund.

The fund liability is reduced by the payments received from the reinsurers.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

Figures in R '000

Retirement benefit assets and obligations continued...

The employees of the University of Johannesburg are entitled to a disability benefit which is housed in a fund. The University of Johannesburg contributes to the insurance policy for the disability funding of their permanent employees. However there is nothing in the fund rules that eliminates the University of Johannesburg's obligation to the employees in the event of the insurance policy not being able to cover the deficit or in the event that there is insufficient assets in the fund. The benefit paid to the disabled employee does not depend on the length of service.

The University of Johannesburg entered into a contract with Guardrisk Life Limited under which Guardrisk Life Limited (Insurer) has underwritten, on payment of a lump sum due in terms of this policy, to provide assurance for eligible employees of the University of Johannesburg.

An eligible employee is an employee of the University of Johannesburg who is employed for at least 24 hours a week. The assurance provided is in respect of disability of a member to the fund. Guardrisk Life Limited has now undertaken to manage the fund and the disability claims. The entity previously had a fund with Momentum. There are members of this fund which have become partially disabled. The initial Momentum Disability Policy will continue to pay 75% of the disability claimant's benefits; the remainder is paid by Guardrisk Life Limited now. The effective date for the policy is 1 January 2016 per the signed contract. The premium was paid on 1 December 2014 and the balance sheet and income statement of this insurance policy was accounted from this date.

A member's membership of the fund shall be terminated on the earliest of the following events:

- a) The death of the member; or
- b) The member attaining normal retirement age; or
- c) The member ceasing to be a member of the Fund; or
- d) Discontinuance of the payment of premiums in respect of a member; or
- e) Absence of the member as defined; or
- f) The permanent departure of the member from the territories in terms of the contract unless accepted in writing.

The University of Johannesburg (Policy holder) shall bear the cost of the premiums required to provide the Benefits to the Members and shall pay the premiums and administrative charges due to the Insurer. The amount of premiums payable to secure the Benefits under this policy shall be calculated by the Insurer in accordance with the scale of premium rates in force under this policy at the date of calculation and will be based on information given to the Insurer by the Policy holder. The profit accumulation of the fund may be used to maintain benefits that could be adversely affected by circumstances beyond the control of the Policy holder. This utilisation of the profit share shall constitute a claim against the policy. The maximum accumulated value of claims may not exceed the accumulated profit. The Insurer's liability in this regard will not exceed the Benefit for which the Policy holder has paid premiums to the Insurer. In this case UJ might have an obligation towards the employees should the policy not have sufficient funds. The contract with Guardrisk life Limited did not impact on any previous accounting treatment and is accounted for on the same basis as in the past.

The risks faced by UJ as a result of the defined benefit obligation are as follows:

- Inflation: The risk that future CPI Inflation is higher than expected and uncontrolled. This would lead to greater than expected benefit
- Long-term liability: The risk that the liability may be volatile in the future and uncertain.
- Future changes in legislation: The risk that changes to legislation with respect to the post-retirement liability may increase the liability for
- Future changes in the tax environment: The risk that changes in the tax legislation governing employee benefits may increase the liability

20.4 Long service award

The University awards long service payments to qualifying staff as predetermined milestones are reached. The actuarially determined liability which is reduced by the provision made by the University was valued at 31 December 2021. This obligation is funded from University's reserves.

Reconciliation of the movement in the long service award obligation:

Present value of obligation: beginning of the year	44,343	44,792	44,343	44,792
Current service cost	5,405	5,700	5,405	5,700
Interest cost	4,238	3,935	4,238	3,935
	53,986	54,427	53,986	54,427
- Actuarial (gain)/loss	3,818	(5,033)	3,818	(5,033)
Benefits paid	(4,021)	(5,051)	(4,021)	(5,051)
Present value of obligation: end of period	53,783	44,343	53,783	44,343
The University's best estimate of awards expected to be paid to employees during the annual period beginning after reporting date:	4,864	4,021	4,864	4,021
The significant actuarial assumptions were as follows:				
Discount rate	10.10%	10.00%	10.00%	10.00%
Salary inflation	7.10%	6.50%	6.50%	6.50%
CPI inflation	5.60%	5.00%	5.00%	5.00%
Expected retirement age	65 yrs	65 yrs	65 yrs	65 yrs

The sensitivity analysis of the liability to changes in the principal assumptions is:

	Change in assumption	Increase in assumption	Decrease in assumption
Discount rate	1%	Decrease by 7.9%	Increase by 7%
Salary inflation	1%	Increase by 8.8%	Decrease by 7.8%
Expected retirement age	1 year	Increase by 3.9%	Decrease by 4.1%

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

Figures in R '000

34. Financial risk management

Overview

The University's activities expose it to a variety of financial risks: market risk (including currency risk, interest rate risk and price risk), credit risk and liquidity risk. The University's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the University.

This note explains the group's exposure to financial risks and how these risks could affect the group's future financial performance. Current year profit and loss information has been included where relevant to add further context.

34.1	Risk	Exposure arising from	Measurement	Management
	Market risk –	Future commercial	Cash flow forecasting and	
	currency	transactions	sensitivity analysis	Forward exchange contracts
	Market risk – interest	Interest bearing investments		
	rate	(long and short term)	Sensitivity analysis	Bank diversification (short term).
	Market risk - security	Investments in equity		
	prices	securities	Sensitivity analysis	Portfolio diversion
	Credit risk	Cash and cash equivalents, trade receivables, debt investments and contract assets	Aging analysis and credit ratings	Diversification of bank deposits, credit limits and letters of credit. Investment guidelines for debt investments
	Liquidity risk	Borrowings and other liabilities	Rolling cash flow forecasts	Monitoring daily cash levels and requirements

Risk Management is carried out by the Finance Division under policies approved by the Audit and Risk Committee of Council which provides written principles for the overall risk management. The Audit and Risk Committee oversees the manner in which management monitors compliance with the risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risk faced by the University. The Audit and Risk Committee is assisted in its oversight role by Internal Audit, which undertakes both regular and ad hoc reviews of risk management controls and procedures. The results of these reviews are reported to the Audit and Risk Committee. Internal Audit follows a risk based audit methodology primarily based on the University's risk registers.

34.2 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates, may affect the University's income or the value of its holdings of financial assets. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on investments. This is principally done by way of mandate agreements with the Fund Managers which specify the asset allocation to manage the risk profile of the investments. The University has no portfolios that have speculative characteristics and return targets are over the long term. For the spread of the various investment types, refer to note 11.

i) Currency risk

The University does not operate internationally, but on occasion there are foreign currency denominated transactions. Management has introduced a policy which requires that all material foreign currency transactions should be hedged with a forward exchange contract. At year-end there were no material outstanding forward exchange contracts. When necessary, forward exchange contracts are rolled over at maturity.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

	Consolidated	Consolidated	University	University
	2021	2020	2021	2020
Figures in R `000		Restated		Restated

Financial risk management continued...

ii) Interest rate risk

The University has large interest-bearing investments. Its investment policy allows management to invest working capital in interest-bearing, short-term investments up to one year. The period of each investment is linked to the cash-flow requirements to fund the University's operations. These short-term investments are invested with the five major South African commercial banks at the ruling interest rate on the day of investment. The rates are fixed for the period of the investment. The amount invested in this manner is specified in note 11.

A 1% change in the interest rate could have a Consolidated R25 453 / University R25 453 (2020: Consolidated R18 052 / University R18 052) interest income influence on an annual basis ie. a Consolidated R25 453 / University R25 453 (2020: Consolidated R18 052 / University R18 052) influence on profit and loss and equity.

This would actually never realise, as the average period of investment is three to nine months and therefore the amount will be a fraction of Consolidated R25 453 / University R25 453 (2020: Consolidated R18 052 / University R18 052).

The University's investment policy determines that all long-term investments, including capital and money market investments are managed by the University's Fund Managers under mandate agreements. These agreements specify the asset allocation matching the risk that the University is prepared to take.

The mandates further specify the investment returns required by the University. These measures are in place to ensure that the various Fund Managers manage the interest rate risk within the levels accepted by the University. The University's Investment Committee oversees its long-term investments. The investments subject to a possible interest rate fluctuation are detailed in note 11.

iii) Price Risk

The University and its subsidiaries are exposed to equity securities price risk because of investments held by the University and classified on the consolidated statement of financial position as fair value through profit or loss financial assets. The University and its subsidiaries are not exposed to commodity price risk. To manage its price risk arising from investments in equity securities, the University and its subsidiaries diversifies its portfolio. Diversification of the portfolio is done in accordance with the limits set by the Investment Committee and the limits are included in the mandate agreement which the University and the Fund Managers concluded.

Listed equities	2,251,622	2,990,307	2,011,204	2,311,618
10% change impact	200.000	300.000	200.000	200.000

For the period ended 31 December 2021, if the FTSE/JSE CAPI index increased/ decreased by 10% with all other variables held constant and all the University's equity instruments moved according to the historical correlation with the index, the non-current investment revaluation amount on the statement of financial position would be Consolidated R2 251 622 / University R2 011 204 (2020: Consolidated R2 990 307 / University R2 311 618) higher/lower. Due to the unpredictability of equity market returns and the asset allocation of various fund managers, a general indicative percentage of 10% is used to highlight the changes in market value on equity investments. The indicative 10% does not allow for the sensitivity in equity valuations due to the asset allocation difference between various fund managers.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

Figures in R `000

Financial risk management continued...

34.3 Credit risk

Credit risk is the risk of financial loss to the University if a customer, student or counter party to a financial asset fails to meet its contractual obligations, and arises from the University's receivables from students and customers, its debt investments and cash and cash equivalents.

The counterparties to investments and cash and cash equivalents are limited to high-credit-quality financial institutions. The University has policies that limit the amount of credit exposure to any one financial institution.

The University follows a multi-manager approach to the management of investments in order to limit investment risk. Funds are invested in divergent portfolios subject to mandates developed to contain risk within set parameters. In order to hedge investment funds against fluctuations, the portfolio managers are allowed to invest a maximum of 40% of the available funds abroad.

All funds are invested with BB+ rated financial institutions, or guaranteed by the government.

Receivables comprise of outstanding student fees and a number of customers, dispersed across different industries and geographical areas. The University is exposed to credit risk arising from student receivables related to outstanding fees. The risk is mitigated by requiring students to pay an initial instalment in respect of tuition and accommodation fees at registration, the regular monitoring of outstanding fees and the institution of debt collection action in cases of long outstanding amounts. In addition, students with outstanding balances from previous years of study are only permitted to renew their registration after either the settling of the outstanding amount or the conclusion of a formal payment arrangement.

i) Student and other receivables

In a higher education environment, it is not possible to manage credit risk ex ante at the level of individual transactions with students. Credit worthiness cannot be assessed during registration. The credit risk is managed ex post by means of effective debt collection, including the sensible application of the withholding of examination results and financial exclusions, as well as the utilisation of debt collection attorneys and agencies.

The University's policy with regard to the collection of student receivables states the following:

- 60% of a student's total fees must be paid by 30 April of the study year.
- 100% of a student's total fees must be paid by 31 August of the study year.
- · If the student fails to meet this financial obligation, the outstanding amount is handed over to a debt-collecting agency.

At year end all student receivables are past due as the last due date is 31 August of that period. In calculating the provision, the student receivables balance is stratified between NSFAS receivables and other student receivables. In calculating the provision for other student receivables a historical loss rate is used and the impact of forward looking information is not material. In calculating the provision for NSFAS receivables, the probability of default is determined using an appropriate credit rating.

Details of the student receivables as at 31 December 2021:

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

Figures in R `000	Consolidated 2021	Consolidated 2020 Restated	University 2021	University 2020 Restated
Financial risk management continued				
Student receivables	692,180	364,510	688,230	360,703
- fully performing	-	-	-	-
- past due but not impaired (4 months overdue)	157,613	89,228	157,368	89,287
- impaired (more than 4 months overdue)	534,567	275,282	530,862	271,416
Less: Provision for impairment	(534,567)	(275,282)	(530,862)	(271,416)
Student receivables – net carrying amount	157,613	89,228	157,368	89,287

The University also raises other trade receivables for the sale of goods and the delivery of services. It has measures in place to ensure that sales of goods and delivery of services are made to customers with an appropriate credit history. It does not insure its student or other receivables.

The University's credit terms with regard to other receivables are:

- · Full payment is required within 60 days from statement date;
- \cdot The University will charge interest on arrear amounts in terms of the Prescribed Rate of Interest Act (No. 55 of 1975), as amended; and
- · Credit facilities will be suspended when debtor accounts are outstanding in excess of 90 days from the date of statement, unless alternative payment arrangements have been negotiated.

The following actions are taken in respect of overdue invoices:

- · Outstanding for 60 days: A reminder letter requesting immediate payment is enclosed with the statement of account.
- · Outstanding for 81 days: The statement of account is accompanied by a letter of demand stating that legal action will be taken
- \cdot Unpaid debts over 102 days: When a letter of demand has been sent and no payment or communication has been received

The provision for impairment is calculated based on the following:

- Outstanding invoices greater then 4 months and invoices handed over to attorneys are impaired
- Oustanding invocies greater then R1 million are assessed for impairment.

Details of the other receivables as at 31 December 2021 are as follows:

Other receivables	156,309	467,128	111,227	452,146

Due to the nature of its operations, the University tracks outstanding fees on an academic year basis. The University considers all prior years' outstanding fees as past due. The University anticipates that the majority of the current year fees will be settled as part of the registration process for the 2022 academic year. It is the University policy that returning students are not allowed to register with outstanding fee debt.

The creation and release of the provision for impaired receivables have been included in 'other current operating expenses' in the statement of profit or loss and comprehensive income. Amounts are charged to the provision account when there is no expectation of recovering additional cash. After a receivable amount is written off, the collection process is continued by the collection agencies.

The credit risk identified above relates to the disclosure presented in Note 10.

The other classes within other receivables do not contain impaired assets. The maximum exposure to credit risk at the reporting date is the carrying value of each class of receivable mentioned above. The University does not hold any collateral as security.

Credit quality of financial assets

The credit quality of financial assets that are fully performing, as well as those that are past due but not impaired can be assessed by reference to external credit ratings (if available) or to historical information about counter party default rates.

34.4 Liquidity risk

Liquidity risk is the risk that the University will not be able to meet its financial obligations as they fall due. The University's liquidity risk consists mainly of borrowings, accounts payable, accrued liabilities and student deposits received and post employment benefits. Liquidity risk is minimised by the University's substantial cash and cash equivalent balances. The University's approach to managing liquidity is to ensure as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the University's reputation. Liquidity risk is managed by monitoring the daily borrowing levels and by conducting cash flow forecasts on a weekly basis in order to maintain sufficient funds to fund the business from cash generated by operations and funds generated from investments.

The table below analyses the University's financial liabilities according to relevant maturity groupings based on the remaining period at the statement of financial position date to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

34.5 Capital risk management

The University and its subsidiaries' objectives when managing reserves and working capital are to safeguard the ability of the University and its subsidiaries to continue as going concerns and to maintain an optimal structure to reduce the cost of capital.

In order to maintain the capital structure, the University and its subsidiaries have ensured a sound financial position by limiting exposure to debt and increasing investment and cash balances. This objective is met by a well planned budget process each year in which the critical strategic objectives of the University and its subsidiaries are addressed. The University also has a short and medium term infrastructure maintenance plan which is adequately resourced from available funds.

34.7 Fair value estimation

 $The \ University \ classifies \ its \ fair \ value \ measurements \ using \ the \ following \ measurement \ hierarchy:$

- · Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).
- Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).
- · Inputs are unobservable inputs for the asset or liability. Unobservable inputs are used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date (level 3).

	2,984,054	251,246	3,235,300

There were no transfers between Level 1 and Level 2 during the year ended 31 December 2021 and 2020.

The fair value of financial instruments traded in active markets are based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by the University is the current quoted closing prices as this is most representative of fair value in the circumstance. These instruments are included in level 1. Instruments included in level 1 comprise listed shares, listed stocks and debentures and government stocks and debentures classified as trading securities at fair value through profit or loss.

The fair value of financial instruments that are not traded in an active market are determined by using valuation techniques. These valuation techniques are selected based on characteristics of each instrument, with the overall objective to maximise the use of observable market data where it is available and rely as little as possible on entity specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2. Fixed deposits, other deposits and loans and endowment policies are valued using the Income approach in which future cashflows are discounted to a current present value using market related interest rates. Borrowings are valued at fair valued by discounting future cashflows to a current present value using market related interest rates based on the entities credit risk.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

37. Contingencies

The City of Johannesburg

The University has contingent liabilities in respect of legal claims arising in the ordinary course of business from billing disputes. It is not anticipated that any material liabilities will arise from the contingent liabilities other than those provided for in note 14. A contingent liability exists with regards to The City of Johannesburg for incorrect allocation of charges, similarly there is a contingent asset for incorrect charges billed towards the University, although these have been settled in March 2022. The legal process has been initiated through the office of the General council to settle on these long outstanding disputes.

Incorrect allocation of charges	9,607	8,324	9,607	8,324
Incorrect charges to be claimed back	(7,267)	(1,600)	(7,267)	(1,600)
Net contingent liability	2,340	6,724	2,340	6,724

38. Going concern

The University continues to adopt the going concern basis in the preparation of the consolidated financial statements. The University's forecasts and projections, taking account of reasonably possible changes in operating circumstances, show that the University will be able to operate within its current financing in the medium term. This is evidenced by financial performance for the 2021 financial year, where revenue levels and cash position at year end increased, resulting in a more favourable, financially sustainable and liquid position at year end. This is further evidenced by the growth in the University's reserves position.

Despite continuing economic uncertainty resulting from the Covid-19 pandemic and other geopolitical and macroeconomic factors, the university continues to attain a net surplus position for the 2021 year, with this surplus trend being projected into the next five years as modelled per the UJ Financial Sustainability Model. The liquidity and solvency ratios are also positive, although a slight reduction from the prior year is noted. This is however still considered more favourable when compared to the 2021 budgeted expectations. All the liquidity and solvency indicators point to the University's ability of being able to meet its obligations into the foreseeable future.

39. Events after balance sheet

No adjusting or significant non-adjusting events have occurred between the 31 December reporting date and the date of authorisation.

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

Figures in R '000

41. Prior period restatement

41.1 A Million Up Investments (MUI) Equity contribution prior period correction

MUI is a wholly owned subsidiary of the University. In 2018 (R44 773) and 2020 (R40 658), contributions were made by the University and classified as donation expense as opposed to capital contributions informed by the intent by Council of supporting the subsidiary without anything expected in return. Subsequently in 2020, the funding was reclassified as a capital contribution informed by compliance requirement under the Income Tax Act, however with the same underlying intent as above. The financial statements' classification hereof have thus been aligned to this requirement, by restating each of the affected financial statement line items for prior periods. Refer to the summary of restatements below for the impact on the consolidated financial statements

41.2 Defined Benefit Pension Fund prior period correction

During the 2021 period it was noted that the previous limitation of the plan net assets recognised in terms of Paragraph 64 of IAS19 was incorrectly applied on the basis that the Trustees would decide on the allocation of future surplus as and when it arises.

In terms of the rules of the fund as found in section 15C(1) of the Pension Funds Second Amendment Act, all surplus is required to be credited to the Employer Surplus Account and thus no limit, or asset ceiling, should have been applied in prior years as has been the case. As a result, the previous asset ceiling understated the net plan assets by R90 178. This error have been corrected by restating each of the affected financial statement line items for prior periods. Refer to the summary of restatements below for the impact on the consolidated financial statements.

Summary of restatements

Junimary of restatements	2020 Reported	MUI Equity	Defined Benefit Pension Fund	2020 Restated

Consolidated and Separate Financial Statements for the year ended 31 December 2021

Notes to the Consolidated and Separate Financial Statements

Figures in R '000

Prior period restatement continued...

41.3 Cash flow statement prior period correction

During the 2021 period it was noted that the 2020 cash flow statement erroneously contained non-cash items. The non-cash items corrected primarily pertain to financial assets purchases and proceeds, as previously recognised within investing activities. These movements do not amount to cash in/outflows within the University's transactions however are transactions effected by the fund managers in line with the University's investment mandate, hence classification as non-cash items. These have subsequently been corrected, with no impact on the cash and cash equivalents balances. Refer to the summary of restatements below for the impact on the consolidated financial statements.

	2020 Reported	Adjustment	2020 Restated
Consolidated			
Statement of Cash flow:			
Cash generated from operating activities	(580,322)	372,635	(207,687)
Purchase of financial assets	(3,904,857)	3,904,857	-
Proceeds from disposal of financial assets	4,277,492	(4,277,492)	-
University			
Statement of Cash flow:			
Cash generated from operating activities	(510,044)	306,860	(203,184)
Purchase of financial assets	(1,241,110)	1,241,110	-
Proceeds from disposal of financial assets	1,547,970	(1,547,970)	-
