

Graduation Programme

The Future. Reimagined.

Dear UJ Graduate

At the University of Johannesburg (UJ), graduation not only signifies an academic milestone but also represents the emergence of a new cohort of leaders. Our objective has been to empower you as leaders who are primed to face the challenges of an ever-changing world defined by a plethora of challenges and opportunities. As you navigate these great societal shifts, we hope that your time at IJJ will serve as a constant source of reference and inspiration. As we have sought to demonstrate, the Fourth Industrial Revolution (4IR) presents the opportunity for the exploration of new and exciting spheres, and you are uniquely poised to navigate this terrain. Our focus at IJJ has been to create graduates who are

agile, curious, and able to be active participants against this backdrop.

Your graduation today serves as a celebration of this momentous achievement! I want to take this opportunity to remind you that you now represent the privileged few in our country. You are uniquely poised to address some of the serious challenges we face and a qualification from IJJ will stand you in good stead!

At UJ, you have encountered the finest academic minds from diverse backgrounds, spanning across the world as well as innovative technology-rich approaches to teaching and learning. As a result, UJ's global stature and academic robustness are recognised by the most

prestigious global higher education ranking systems in the world. IJJ has become a competitive player, not only in South Africa but also on the continent. You are an important part of this story.

We welcome you as a new member of our esteemed alumni community, which is making a lasting impact on society. We encourage you to join the IJJ Alumni Network and become an active member of the University Convocation, which affords you an opportunity to make a significant contribution to our academic projects and beyond. Our promise in return to you is that we will continue to build IJJ as an international university of choice, anchored in Africa, dynamically shaping the future.

Congratulations on this significant achievement. We look forward to witnessing you reimagine the future!

Let us rejoice, therefore,
While we are young.
After a pleasant youth
After a troubling old age
The earth will have us.
Long live the academy!
Long live the professors!
Long live each student;
Long live the whole fraternity;
For ever may they flourish!

Mthombeni, Solomon Karabo (Sport Science)

Thesis: Elite athletes from historically disadvantaged areas representing South Africa at the summer Olympic games: An exploration of support systems

Supervisor: Prof H Noorbhai

Smith, Lynn (DPhil)

Lynn Smith has been a lecturer in the Department of Sport and Movement Studies at the University of Johannesburg for the past 10 years. She obtained her Master's degree in Biokinetics from the University of Johannesburg in 2014, where she also completed her Honours (Biokinetics) and undergraduate Bachelor of Science (Life and Environmental Science with Sport Science endorsement) degree. She is a qualified Biokineticist, registered with the Health Professions Council of South Africa. She has published six articles in accredited journals. One of these was published from her doctoral research.

This thesis aimed to develop a toolkit, consisting of two questionnaires, to adequately assess the health-related quality of life of patients living with selected non-communicable diseases within a South African context. During focus groups and semi-structured interviews with healthcare practitioners and patients, it became clear that the concept of health-related quality of life is poorly understood and under assessed in medical practice. It also became apparent that there were many disparities between healthcare services offered at the private and public sector levels. The major contribution of this research in both a South African and international context is that it will provide healthcare practitioners with cost-effective, valid and reliable tools that can be administered easily to patients from various socioeconomic backgrounds. It will also emphasise the need for a more holistic and comprehensive approach to diagnosing, evaluating and treating illnesses, such as diabetes mellitus, hypertension, and other cardiovascular disease.

Supervisor: Prof HF Morris-Eyton

Mthombeni, Solomon Karabo (PhD)

Solomon Karabo Mthombeni completed his Master's degree in Biokinetics in 2017 and, most recently, his Doctor of Health Sciences in Sport Science. His doctoral research was aimed at exploring support systems among South African Olympians from historically disadvantaged areas. The study discovered poor financial and sponsorship support at development level, poorly maintained sport facilities, dysfunctional school sport systems in townships and rural areas, lack of scientific, medical, logistical support, and mentorship, as among the significant barriers towards achieving sporting success. The study developed a conceptual framework for athlete support and career pathing. This has important implications in the transformation and inclusivity of South African sport. Solomon has published his findings in the *International Sport Studies Journal* and presented his work at the International Festival of Sport and Exercise Medicine Conference in 2022. Solomon continues to conceptualise a new funding model for South African sport to allow for effective transformation in the sector.

The candidate's research was aimed at exploring support systems among South African Olympians from historically disadvantaged areas. The findings identified inherent barriers towards sporting excellence and transformation, but also developed a conceptual framework for athlete support and career pathing for this population group. The findings have been published in international journals and presented at the International Festival of Sport and Exercise Medicine conference. The candidate continues to conceptualise a new funding model for South African sport.

National Anthem of South Africa

Nkosi sikelel' Afrika
Maluphakanyisw' uphondo lwayo,

Yizwa imithandazo yethu,
Nkosi sikelela, thina lusapho lwayo.

Morena boloka setjhaba sa heso,
O fedise dintwa le matshwenyeho,
O se boloke, O se boloke setjhaba sa heso,
Setjhaba sa South Afrika - South Afrika.

Uit die blou van onse hemel,
Uit die diepte van ons see,
Oor ons ewige gebergtes,
Waar die kranse antwoord gee,

Sounds the call to come together,
And united we shall stand,
Let us live and strive for freedom,
In South Africa our land.
