- Limited space available, therefore registration will be determined by space availability.

CURRICULUM

Basic Mathematics and Quantitative Techniques for Logisticians:

TSCB1Y1

This module follows a practical training approach, in which students are introduced to the role and importance of quantitative techniques in logistics management as well as the teaching of basic mathematical and quantitative skills required in logistics management.

Industrial Relations: TSCB2Y1

This module familiarises students with the basic theoretical and practical foundation underlying industrial relations in South Africa. The module provides grounding in management philosophy, the role of the State, constitutional principles, trade unions, collective bargaining, negotiations, recognition agreements, strikes, unfair labour practices, etc. The implications of various management approaches for optimising industrial relations in the future are covered, and case studies are used to provide opportunities for the practical application of the principles discussed.

Managing Road Transport Operation: TSCB3Y1

This module gives students the ability to understand an organisation and make supervisory decisions on a visionary basis. It allows students to understand the organising and use of resources. The components of management are covered and related to transport. The application of managerial concepts to work teams is studied and explained.

PROGRESSION

On completion of the Bridging Programme, a student will be able to apply for a Diploma Programme UJ (CEP) as indicated on page two.

ASSESSMENT (Assignments and examinations)

- Students will be required to submit two assignments per module online on due dates provided by the Department.
- Submissions of assignments is compulsory in order to gain access to the examination.
- The examination is written during October and students will be required to write one examination paper per module.

- Examination is written over three days.
- The examination is a sit-down invigilated examination to be written at any of the approved examination centres in South Africa only. These examination centres are in Johannesburg, Durban and Cape Town.
- A subminimum of 40% is required in the examination paper in order to pass a module.
- A combined final mark of 50% is required to pass a module. (assignment mark and examination mark).
- The assignment mark will count 25% and the examination mark will count 75% towards the final mark for the specific module.
- A student may be granted a supplementary examination opportunity in accordance with the criteria determined by the University.

CREDITS

- 63 credits
